HILL'S HARDY HEDGE COLLECTION
AMOOR RIVER PRIVET
This is conceded to be the best plant for hedge purposes grown. It is partially Evergreen and as an ornamental hedge it is beautiful throughout the year. It is absolutely hardy, of easiest culture, and will grow in any soil or situation. Of rapid growth and makes a perfect hedge in two seasons. Can be trimmed to any shape or height. Plant 18 inches apart.

Special Offer No. 101
50 Amoor River Privet $2.90

Special Offer No. 102. Hill's $1.00 Shrub Collection
Six beautiful Flowering Shrubs, 2 of each variety described below. Large, strong 3-year plants for immediate effect, 1½ ft. high.

HYDRANGEA. One of the best ornamental shrubs. Blossoms profusely throughout July and August. The large, massive cone-shaped flowers often measure ten inches in length. See illustration.

SPIREA, or BRIDAL WREATH. A splendid new garden shrub entirely hardy in any climate and the most beautiful of all. Immense snow-white blossoms, pure white flowers borne in elegant plume-shaped clusters all over the plant as shown in illustration, page 21. We believe this to be the finest of all Spireas, and one of the most satisfactory shrubs to be had.

GOLDEN MOCK ORANGE. The Golden Mock Orange is one of the most attractive and beautiful shrubs we grow. Of vigorous habit, forming medium-sized, well-formed, compact bushes. The leaves are a rich golden color, and contrast beautifully with the green of other shrubs. See illustration, page 25.

Combination Offer No. 103
You can order any one of the above special offers, or as many as you want, but we will ship all three to you for the exceptionally low price of $4.90. This is almost an unheard of offer, and we are only enabled to do it because of our immense and wonderful stock; furthermore, we want to become acquainted with you.

A Special Word. We invite your special attention to the fact that in this catalog all illustrations are made from actual photographs of stock as it stands in our own grounds, or on the grounds of our customers who have purchased stock from us. In every case therefore, our illustrations give an accurate idea of the appearance of the trees, shrubs and plants shown. You can depend upon the pictures and descriptions in Hill's catalogs, just as you can depend upon the quality of Hill's trees.

We cannot change or alter the SPECIAL OFFERS at prices quoted.
A WORD OF APPRECIATION.

We wish here to express sincere thanks to our many friends and patrons, who have written kind words relative to the quality of stock and treatment they have received from us the past season. We greatly appreciate these expressions of confidence and shall endeavor to maintain the reputation they have so kindly given us.

QUALITY.
The name of D. Hill, has come to be synonymous with "High Quality" in Trees, Shrubs and Plants. Over half a century of conscientious effort, unbounded enthusiasm, a close study of the value of every new specie introduced; and above all an ambition to make new friends and keep the old, has been the method by which this high position has been reached.

YOUR SUCCESS WITH OUR STOCK
is a matter in which we are mightily interested. Therefore we endeavor to do everything reasonable within our power to help you succeed with the stock we send you, because we love trees and want you to enjoy them also. No firm is more careful in filling orders: we use every reasonable means to learn the customers' wishes without delaying the shipment. Your interests are our interests, and we present you this 1910 catalog confident that we merit your trade, and assure you of the best treatment, whether the order is large or small.

SUGGESTIONS TO ALL WHO BUY.
Order Early. You will find that it pays—no waiting, no worry, and you get better served, so be sure to allow yourself plenty of time. In ordering please use printed envelope and order sheet enclosed. Others will be sent upon request.

Our Terms are cash with order, except when satisfactory bank reference is given, when we will gladly open an account. Money may be sent at our risk if forwarded by Post Office Money Order, Express Money Order, Bank Draft, or In Registered Letter. Do not use order sheet for correspondence. As a matter of economy, both to our customers and ourselves, we prefer not to accept orders for less than 50 cents.

We always do better than we promise in the way of extra trees and plants so that when the order will at all afford it, we add to it something gratis, often a choice or new kind.

GET YOUR OWN TREES FREE
See 50 Great Bargain Sheet, and learn how to get 100 trees free. Thousands took advantage of our generous Club offer last year and got their own trees free. Kindly send all orders, money and correspondence, plainly addressed to,

D. HILL, Evergreen Specialist
Dundee, Ill., U. S. A.
HILL'S HARDY EVERGREENS.

The varieties offered here are all those which have been time tested and proven absolutely hardy and reliable. Our long experience has taught us how to grow and root them, as well as how to dig, pack and ship them to all parts of the world with safety.

Seedlings and Transplants. We have designated our stock particularly the Evergreens, as Seedlings and Transplants which offers a wider range of selection in the size of the plants. Seedlings are two, three and sometimes four year old trees that have not been taken from the ground and replanted, coming directly from the original seed beds.

Transplants are trees which have been taken from the seed beds and replanted. Transplanting adds value to the tree by developing an abundance of fibrous roots. The trees become heavy and stocky.

Ball and Burlap. Trees designated B & B means, that they are dug with large ball of earth and burlapped, leaving the roots undisturbed. This in most cases absolutely guarantees their success. When planting these trees it is not necessary to remove the burlap, simply cut the strings and place tree in position. Always water well after planting.

BALSAM FIR.

The oldest and best of fast growing Evergreens for windbreak and shelter planting, is the Balsam Fir. Tall, straight growing, with dark green foliage. An admirable tree for planting in the North and Northwestern States. Its extreme hardiness enables it to withstand the coldest of Winter winds and weather. The needles emit a pleasing fir odor.

Price: Transplants Each 10 100
12 to 15 inch .......... $0.25 $1.00

8 to 10 inch ............ $2.00 $0.00

HEMLOCK.

A beautiful Evergreen of graceful habit and unequalled for ornamental planting, but on account of the enormous demand the last few years has become quite scarce. For garden, lawn or park planting, this variety stands out as one of the best. Attractive at all seasons of the year, especially in the Spring and Summer when the new growth comes forth a delicate light green, soft and fern-like. It is one of the few Evergreens which thrives in a partial shade. Excellent for hedges responding readily to shearing and can be kept to any desired height or form.

Price: Transplants Each 10 100
6 to 10 inch .......... $0.25 $2.00 $15.00

7 feet, B. & B. .......... $4.00 $37.50

DOUGLAS FIR.

A variety from the Rocky Mountains and always referred to as one of the most beautiful and valuable of American Conifers. Has strong upright habit of growth, with beautiful soft green foliage upon long drooping branches. A rapid grower and exceedingly valuable for ornamental planting, either in groups or as single specimens, and much used for thick screens and windbreaks. Being perfectly hardy enduring extreme heat as well as extreme cold, it can be planted successfully in all portions of the country. Grows to large size often reaching a height of 50 to 60 feet.

Price: Transplants Each 10 100
10 to 12 inch .......... $0.25 $1.50 $12.00

Seedlings 100
4 to 6 inch .......... $1.25 $10.00
6 to 8 inch .......... $1.75 $12.00
CONCOLOR FIR.

A beautiful Evergreen from the Rocky Mountains, and in ornamental value, second only to the Blue Spruce. Its foliage is very striking varying in color from light green to dark blue, and is long, soft and graceful. In appearance it is entirely different from any other variety. Being a comparatively rapid grower, it soon matures into tall broad specimens of magnificent beauty. Indeed, it is today, without doubt, the most successful of all Firs, and has become so widely known and appreciated that it is planted extensively throughout European countries, where it is also very popular and much admired for its many sterling qualities. A tree perfectly hardy, even in the most exposed situations and long lived, reaching at maturity a height from 60 to 50 feet. They are evenly branched and shapely even when very young, and never loose their lower branches. Beautiful effects are produced by planting a group consisting of a combination of Concolor Fir, Blue Spruce and Douglas Fir, as their charming tints of blue contrast prettily and nothing could be more ornamental for lawn.

Price:  
Transplants Each 10 100

5 foot, B. & B. 6.00 60.00  
6 to 8 inch ...... $3.50 $30.00

RED CEDAR.

A tall growing Evergreen, of remarkable hardiness and immensely attractive. It is one of the oldest and best known of the Evergreen family, growing in its various forms throughout the United States. Its rapid growth and extreme hardiness make it one of the most popular and widely planted trees we offer. For screening suddenly or forming windbreaks it is indispensable. Long lived always retaining the bottom foliage. For middle-western and western States the Red Cedar is unsurpassed.

Price:  
Transplants Each 10 100  
6 to 10 inch ...... $0.15 $ 1.00 $ 8.00  
10 to 12 inch .......... $0.20 $ 1.50 $11.00

6 to 8 inch ...... $3.00 $25.00

IRISH JUNIPER.

An upright formal growing Evergreen used only for ornamental planting. It is a most satisfactory tree for cemetery and garden use. Very dark green with delicate sharp pointed needles.

Price:  
Transplants Each 10 100  
18 to 24 inch ...... $0.35 $ 3.00 $25.00  
2 to 3 feet ...... $0.75 $ 7.00 $60.00

SABINA JUNIPER.

A dwarf form of hardy Juniper with trailing or spreading branches, rarely attaining a height of over three feet, forming a flat crown several feet in diameter. With its fine dark green color, its unique beauty and attractiveness is unexcelled. There is such an air of gracefulness and lightness in the easy rounded curves of each little branchlet of this rare little tree that it commands the admiration of every lover of Evergreens. It is valuable for border planting in front of taller growing Evergreens and superb for planting in wild rocky landscape, or for covering unsightly features on a lawn. Several of these trees massed close together present an attractive appearance on account of their healthy vigorous, though dwarfish growth, and peculiar somber hued foliage. This variety is an introduction from southern Europe, and our stock of this specie, comprises strong well grown trees of extra quality.

Price:  
Transplants Each 10 100  
1 foot ...... $0.50 $ 4.50 $40.00  
1½ foot ...... $0.75 $ 6.00 $60.00  
2 foot ...... $1.00 $ 9.00 $90.00
AUSTRIAN PINE.

Another variety used largely for windbreaks, screens and shelters. They are fast growers, and very hardy, enduring successfully extremes of heat and cold. A windbreak of this variety can be established with little outlay of money, because the seeding sizes can be used. See illustration.

Price: Transplants Each 10 100 1,000
10 to 12 inch $0.15 $1.00 $7.00
Seedlings 100 1,000 10,000 Seedlings

6 to 10 inch 1.35 10.00 12 to 15 inch 2.50 20.00

JACK PINE.

Grows and thrives on barren, sandy soils, where other trees could not live. It is especially valuable for cold bleak situations, and it is well adapted for the sandy soil of our Western States. Exceedingly rapid in growth, attaining great size.

Price: Transplants Each 10 100 1,000 Seedlings 100 1,000
4 foot B. & B. $0.75 $7.00 8 to 10 inch $1.25 $10.00
Seedlings 4 to 6 inch $1.00 $6.00 12 to 15 inch strong 2.50 15.00

PONDEROSA PINE.

A fine hardy species from the Rocky Mountains. One of the most reliable, fast growing Pines we offer, rapidly attaining a height of 75 to 100 feet. Will do well on any drained soil. It is one of the old reliable time tested Evergreens, having been used for windbreaks, shelters and groves for fifty years. A variety of inestimable value for planting in States of Nebraska, Kansas, Missouri, Oklahoma and the Dakotas.

Price: Transplants Each 10 100 1,000 Seedlings 100 1,000

For Windbreak planting these varieties are unsurpassed.

DWARF MOUNTAIN PINE.

These beautiful Pines are not excelled by any other tree when adaptability and usefulness is considered. It seldom grows larger than six feet tall and twice as broad, its branches curving outward then upward from the stem at the ground. It looks entirely different from all other Evergreens. Its foliage is of dark green color, the branches stiff and stubby. They are indeed one of the most rare little Evergreens we offer. Its native home is in the Mountains of Switzerland from where we obtain our seeds direct. Are especially adapted for numerous purposes such as group planting, low borders, and individual specimen planting. Being perfectly hardy they can be planted successfully in all sections of the country.

Directions for Planting Windbreaks.

In planting trees for windbreak, success depends to a great extent upon the manner in which the ground is prepared to receive them. It should be carefully plowed or spaded as deeply as possible, and some rich compost or fertilizer added. If seedlings are used plant them from one to three feet apart in the row and the rows ten feet apart, and thin out when they begin to crowd. If Transplanted trees are used, five feet apart in the row, and the rows ten feet apart, is a good distance.

Three rows ten feet apart, breaking joints, make a very satisfactory windbreak. Plant the extra tall, fast growing varieties, (Pines,) in the row forming the outside, medium growers (Spruce) in the middle row, with the low growing trees (Arbor Vite, Cedars, and Firs) to form the inside row. Hoe or cultivate thoroughly the first few Summers after planting especially during July, August and September. Water generously at frequent intervals during Summer.
**WHITE PINE.**

The White Pine is the grandest and most noble Evergreen found growing in the United States. Foliage long and soft green with a delicate tint of blue upon the under side of its needles. Grows tall stately and graceful in outline developing into handsome specimens, therefore valuable for ornamental planting. They are also especially recommended for windbreak, screen or shelter belt planting in exposed locations. Rapid in growth and extremely hardy, thriving equally well in all parts of the country, it is known as the King of the forests. The Dundee Nurseries specialize in White Pine, the seed beds of this variety alone covering an area of many acres. We grow them in all sizes from 4 to 6 inches up to ten feet in height, and can furnish them in any quantity up to ten million plants. Our stock of both Seedlings and Transplants is of extra high quality, being strong, stocky and bushy.

**Forest Planting.** Those wishing to purchase White Pine seedlings in large quantities, for reforestation purposes will confer a favor by writing for special quotations. Complete information regarding forestry, etc., can be obtained by writing the U. S. Bureau of Forestry, Washington, D. C.

**SCOTCH PINE.**

Scotch Pine is one of the hardiest of Evergreens. Of very rapid close growth when young, it has been planted more extensively than any other Evergreen on the cold prairies of our North and Northwestern States, where it thrives with immense success. Grows on any drained soil and is not affected by drying winds or hot sun. Good results are obtained by mixing it with other hardy Evergreens, for windbreaks, shelterbelts and screens.

**Dear Sir: My Evergreens came all right. They are the finest lot of trees I ever saw. Thanks for the present of Spruce and extra Concolor. Every one of those I ordered last year grew and are looking fine.—Pomeroy Mather, Washington, Iowa.**
AMERICAN ARBOR VITAE.
(Thuya Occidentalis.)

There is no Evergreen either native or introduced which will endure so much hardship and grow on as great a variety of soils, even under adverse conditions as the Arbor Vitae. We have the largest and finest stock of this variety in the country. Owing to its compact appearance when sheared and its bright green color, it is without doubt the best tree for hedge purpose that grows. Remarkably rapid in growth and still not affected by the coldest of bleak wintry winds, it can be planted in the most exposed locations with entire success. When planted in groups or singly it grows tall and pyramidal, its beautiful flat fernlike branches overlapping each other forming a symmetrical specimen unsurpassed for rich beauty. It thrives with equal success, North, South, East and West, its many good qualities combining to make it the most valuable tree that grows.

Planting and Care of Evergreens.

The best results are secured by transplanting Evergreens in the Spring, especially is this true of the smaller sizes. However, Fall planting, if properly done, is attended with small loss. Do not let the roots become dry or exposed to the wind and sun, and if the weather is dry, dip the roots in water before planting. The size of the hole will depend upon the size of the tree to be planted, and it should be large enough to hold the clump of roots without crowding. If it occurs in digging that the surface soil is better quality than that found further down, as frequently happens, put a small quantity of this to one side and replace it in the hole before the tree is inserted. After adjusting the roots in the hole as nearly as possible in the position which they formerly occupied, fill the earth in gently and thoroughly around them, packing the soil firmly with the ball of your foot. As a finishing process, after filling in the hole and firming the soil well about the tree, apply as a mulch, several inches of well rotted straw, coarse manure or grass. Too much emphasis can scarcely be laid upon the importance of this last step. With Shade, Fruit and Ornamental trees it is possible to preserve a balance between top and roots by cutting back the former if the latter be injured, but this is not practical in dealing with Evergreens. To protect the roots against drying by exposure to sun and wind they must be carefully wrapped in a wet sack, piece of burlap or old cloth, even if moved only a short distance. If the soil is poor the trees will be benefited by having thoroughly rotted manure spaded into the earth about them, but this must not come in to direct contact with the roots, and fresh manure ought never to be used. Evergreens should be watered well during the months of July and August, as at that time they make new roots, and consequently need lots of moisture.

Dear Sir: The Arbor Vitae that you shipped me on the 23rd just arrived and are beauties.—James Lague, Washburn, Texas.
Wind-breaks, Shelter-belts and Screens. Every country home should have its shelter-belt of Evergreens. Windbreaks are not meant for the sole use of Orchardists as was once thought, but should be so commonly planted as to protect every home exposed in the least to the ravages of wind and storm. The saving in fuel alone will defray the cost of planting material in a few years' time; nor need one wait a dozen years or even half so long for Evergreens to grow large enough to afford protection against piercing winds. Results may be secured in a comparatively short time by planting quite thickly, the superfluous trees to be removed from time to time as they encroach upon those which it is designed to leave for permanent shelter. Many an exposed barnyard, poultry run or apiary might be transformed into a place of genuine comfort for its inmates on wintry days, by planting along its Northern and Western sides, a row of White Pine, Norway Spruce, White Spruce or Arbor Vitae and almost all of the Pines and a good many of the Firs are equally valuable for windbreak planting. A properly constructed windbreak is a valuable asset to any farm or country home, and is not only a distinct advantage to live stock as well as buildings, but it is also highly ornamental. Compare the illustration above with some of the farm homes you have seen utterly devoid of trees of any sort. Is it not safe to assume that the most pleasant place to live would be one surrounded by rows and groups of Evergreens? They certainly tend not only to protect the dwelling from the chilly blasts of Winter and thus greatly reduce the necessary expense of warming the house in Winter, but it is an acknowledged fact that trees planted about the home tend also to keep it cooler in Summer and surely the grateful shade and increased comfort that trees give both to man and beast are points that cannot be figured in dollars and cents, but assuredly they are a great advantage.

A Mixed Planting. Often a windbreak can be worked into general landscape effect and greatly enhance the beauty of home lawn or garden by informal groupings and combining different shades of color. Then an irregular shelter-belt of Evergreens becomes, with Elms, Maples, Lindens and other trees, a most charming addition to the landscape.

Dear Sir: I received a shipment of Evergreens from you 18 years ago, 130 trees in all and planted them for a windbreak; now they are all large and fine. I did not lose a single tree.—Henry Groupe, Marion, Iowa.

Dear Sir: Please quote lowest price per hundred for 2½ to 3 foot American Arbor Vitae and Norway Spruce. The Spruce I bought of you ten years ago are beauties. Many times their cost would not buy them now.—J. E. Howard, Montrose, Mich.

HILL'S "FAVORITE" WINDBREAK COLLECTION.

Special Offer No. 106. Price $5.00.

25 Norway Spruce 10 to 12 inch transplants. 25 American Arbor Vitae 10 to 12 inch transplants.

25 White Pine 8 to 10 inch transplants. 25 White Spruce 8 to 12 inch transplants.
**Norway Spruce.**

In describing the Norway Spruce which has been so abundant-ly and widely planted all over the United States, we feel that we are dealing with a tree already thoroughly well known to most people. Owing to its rapidity of growth and hardiness, together with the fact that it readily adapts itself to almost any soil, this variety has become a general favorite. There is scarcely a park, cemetery or farming community where it cannot be found in abundance. Its extremely rapid habit of growth recommends it as especially valuable where speedy results are desired. Its dense growth forms an almost impenetrable bar-rier to the sharp winds and frosts that cause great damage to fruit and stock. The Norway Spruce stands shearing well and is recommended highly for close hedges. Its great hardiness en-ables it to withstand the most rigid northern climate. Its grace-fulness of outline, rapidity of growth and dark verdure, also render it particularly pleasing and well worthy of the populari-ty it holds as leader in the list of Evergreens. This variety is used for so many purposes and apparently it serves them all successfully. For dense shade on lawn, and for planting along line fences, walkways, drives, and around orchards, vegetable gardens, etc., it is unsurpassed. This wonderful variety is also much used for stock shelter, around barns, pig-pens, poultry runs, apiarys, etc., where their quick growth and masses of foliage combine to form a quick and permanent shelter. It is without doubt the easiest tree to transplant of the entire list, as when properly grown they naturally form a mass of splendid fibrous roots.

**White Spruce.**

The White Spruce is a native of the northern portion of the United States and Canada which guarantees its extreme hardiness. On account of its compact habit of growth, regular conical outline, and soft glau-cous green color it has gained a popularity second only to the Norway Spruce and the charming color of the tree has made it a great favorite for ornamental planting especially when planted in a group with darker foliaged Evergreens, the contrast being delightful. The main reason however for the popularity of this tree is its value for use for practical purposes, such as windbreaks, shelter-belts, etc.

**Black Hill Spruce.**

No Evergreen is better adapted for general planting than the round, compact, evenly branched Black Hill Spruce. No tree adapts itself more readily to conditions. An Evergreen unsur-passed in beauty and at the same time one with a most rugged constitution. It is absolutely the hardest of all Spruces. We recom-mend this variety very highly combining as it does both the qual-ities of ornament and utility to a high degree. In the little it requires it is self-sufficient. For ornamental plantings its at-tractive foliage makes it extremely valuable for park and lawn planting, which, in addition to its longevity and ease of culture surely entitles it to a position among the leaders. Of large growth, reaching height of 75 to 80 feet.

3 Norway Spruce 12 to 15 inch
3 White Spruce 12 to 18 inch
3 Black Hill Spruce 15 to 18 inch

---

Dear Sir: I have never had such fine Evergreens from any Nursery as you sent me last Spring. They came with a ball of earth around them apparently never knew they were moved.—J. W. Taylor, St. Paul, Minn.
Blue Spruce (Picea Pungens).

The Dundee Nurseries have, for a number of years, given special attention to the growing of this beautiful Evergreen, and we take special pride in calling your attention to this King of Conifers, the Blue Spruce. This tree grows over a greater range of territory than any other member of the Evergreen family, and is without doubt, the most ornamental of all. They naturally form a perfectly shaped tree with an abundance of heavy foliage of a rich blue silver color, which flashes and sparkles in the sunlight. As we have made a specialty of this variety for many years, we have succeeded in building up a magnificent stock (without doubt the largest in the world) and in walking through our Nurseries one sees block after block of these wonderful trees in all sizes and stages of growth, perfect in form and color, which annually attract many visitors from all over the country. We offer three types of this wonderful variety—The Grafted Blue Spruce, the Colorado Blue Spruce and the Colorado Green Spruce.

Shipped with Soil. Blue Spruce are all dug in a special manner, leaving a neat ball of soil undisturbed about their roots, securely tied in burlap; such trees seldom die and always make a good growth the first year.

GRAFTED BLUE SPRUCE (KOSTER'S).

These are an absolutely true blue type of the Blue Spruce, every tree being perfect both in form and color. They are propagated by special workmen, expert grafters who carefully select the grafting wood, and perform the delicate operation. This all takes place under double glass in special greenhouses and entails a long and careful process of giving each tree special treatment every day. After the wounds heal they are planted out in nursery rows; nursed and cared for as tenderly as a child, cut, pruned trimmed, staked and transplanted at regular intervals until the tree has reached perfection in form and color.

Hill's Collection of Choice New and Rare Evergreens.

The varieties offered on this and ensuing pages are those which have been carefully selected from among thousands of varieties, fully tested as to hardiness and adaptability, and chosen for their remarkable characteristics of beauty and utility. Some are propagated by seed, the majority either by the grafting or layering process. Each represents the fruit of over half a century of "Knowing How" behind it and the high reputation of Hill's quality to maintain. We need scarcely emphasize the superior varieties they derive from their sources of supply, for that is apparent to every one who plans and admires beautiful trees. Yet it is only during recent years that there has been a general awakening to the utility of these fine Evergreens, of our own and foreign lands, for lawn and garden decoration. France, Holland, Japan, China, New Zealand and other lands contribute Evergreens which rank foremost amongst the most prominent beautiful objects used for lawn decoration. Our stock consists of over one hundred varieties and your attention is drawn to the fact that they are all hardy. All are dog with ball of earth except where noted.

**WHITE TIPPED JUNIPER.** A broad pyramidal tree with dense foliage, growing 15 to 20 feet tall. This Juniper is one of the most attractive and useful of the entire list for lawn and garden planting. The foliage of its delicate blue-gray silvery-bronze color is of a bright silver-white shade with just a slight greenish tinge the tips of which change abruptly into a soft creamy white color. It is certainly a sensational triumph in Conifer growing, the tree having unsurpassed beauty, of a totally distinct characterized by growths, of an eminently horticulturist as "a marvel of rich beauty." The tree is rapid in growth and after extensive trials and tests were made it absolutely hardy everywhere. Grows naturally to perfect form, and no clipping or shearing is necessary.

**Price:**
Transplants Each
1 to 2 feet, B. & B. $3.00 $15.00
2 to 3 feet, B. & B. 3.00 27.50
3 to 3½ feet, B. & B. 4.00 37.50

**JUNIPERUS PROCUMBENS.** This hardy creeping plant was introduced some years ago from the northern portion of Japan and as the name implies this splendid tree is of low growing, trailing or creeping form. It has filled a long felt want and it has so many good qualities that we are quite certain it will find place in the lawn or garden of every lover of beautiful trees. With its slender trailing branches and spreading foliage of deep rich green color, this charming little tree is unsurpassed in beauty. In season too its branches are covered with small, dark shining purplish colored berries which enhance its beauty to a wonderful extent. It is much used for terraces and rockeries and is also immensely attractive when placed in borders before taller growing Evergreens and Shrubs. It is a vigorous grower often extending along the surface of the ground to 7 to 8 feet, in every direction. Hardy in every section of the country and no matter where you live, they will give you perfect satisfaction. Our stock comprises perfectly grown specimens, round and even branched, the larger sizes being ten years old.

**Price:**
Transplants Each
1 to 2 feet, broad B. & B. $1.75 $15.00
3 to 3½ feet, broad B. & B. 5.00 47.50

**JUNIPERUS GLAUC.** Again we desire to call your attention to this magnificent tree which maintains itself as one of the best that has ever been introduced into this country from Europe. From the standpoint of beauty, form and hardiness it is preeminently the juniper par excellence. An Evergreen of the most beautiful type, it is perhaps the best known of all new varieties and is now widely planted throughout the United States, in ornamental lawn and garden plantings. It grows very slowly and assumes an early an unusually graceful habit. The foliage is slender and pendent, yet vigorous, and a light silver blue in color, forming the most perfect round shaped tree imaginable. The above points of superiority the stinging qualities of longevity and practical utility, we find Juniperus Glauca to be undoubtedly one of the best trees in the world for garden planting. Our stock is extra choice of uniform size and color.

**Price:**
Transplants Each
1½ foot, B. & B. $1.50 $13.50
2½ to 3 feet, B. & B. 3.00 27.50
JUNIPERUS SCHOTTI.

A native of Europe, found growing originally at a considerable elevation on the Mountains. It forms one of the most beautiful of ornamental trees, being very compact and conical in shape, and completely clothed with a mass of foliage, of a charming dark green color, which during some seasons is generously interspersed with large bright purple berries. Altogether it is a remarkable variety and without equal in its class. In addition to its ornamental qualities, we find it to be a tree absolutely hardy everywhere, of moderately rapid growth, easily adapting itself to all conditions of soil and climate. Our Juniperus Schotti, are perfectly grown specimens, grafted plants, symmetrical in form and uniform in color. When sheared yearly they form a very desirable tree for planting in tubs and boxes, to be used for decorating porches, steps, walk borders, formal gardens, etc. Grows 16 to 20 feet in height.

**Price:**
- Transplants Each 10
  - 1½ to 2 feet, B. & B. $1.50
  - 2 to 2½ feet, B. & B. 2.00

**JUNIPERUS JAPONICA AUREA.**

The most interesting of all dwarf Junipers. Of remarkable beauty, and especially noted for its wonderfully rich, charming foliage, of a light golden color which pervades every portion of the tree. When quite young this variety is prostrate, and trails along the ground, but as it increases in age it gradually assumes a compact, conical form. There is no other tree in cultivation just like it, and it is without doubt the most valuable production in the horticulture line Japan has ever given us. We do not know of one other plant having such a wealth of rich golden color; and would recommend every lover of the beautiful to introduce this hardy and lovely little Juniper into all their lawn and garden plantings.

**Price:**
- Transplants Each 10
  - 2 foot, B. & B. $2.25
  - 3 to 4 feet, B. & B. $5.00

**ORIENTAL SPRUCE.**

As an ornamental Evergreen, Oriental Spruce has long been a favorite with American planters on account of its regular conical form, slender delicate branches and deep green coloring. No Evergreen fits more readily into a small group or on lawns of limited space. On account of its straight pyramidal growth it requires little space, and develops to its best state of perfection within a small area. It emphatically a hardy tree, not being affected in the least by snows and hard freezing. We recommend it as being especially fine for single specimen planting upon the lawn. Grows 20 to 35 feet high, a perfect pyramid in form, always providing the branches around the base.

**Price:**
- Transplants Each 10
  - 10 to 12 inch $0.25
  - 1 foot, B. & B. 1.00
  - 1½ to 2 feet, B. & B. 1.75

**WEEPING NORWAY SPRUCE.**

A most useful and ornamental Evergreen, growing to large size while its branches grow always in a drooping position, growing straight down and finally spreading out gracefully upon the ground around the base of the tree. This is always a popular tree. We sell them in quantities every year. It is widely planted as a lawn tree, for which purpose it is well adapted, always growing conical in form and requires little space. The Weeping Norway Spruce is robust and hardy, not affected by the most severe Winter weather, adapting itself to soils and conditions very readily. As will be seen from the illustration the most striking characteristic of this variety is its odd form of growth. The branches take on a decided droop, the topmost limbs often growing directly downward.

**Price:**
- Transplants Each 10
  - 1½ to 2 feet, B. & B. $2.00

**Hill's "Tri-Color" Collection.**

**Price** $3.65.

GEO. PEABODY’S GOLDEN ARBOR VITÆ. A variety produced by grafting, and for beauty of foliage and form it is unsurpassed. Such an abundance of bright golden color is seldom borne on a single tree, but this one fairly glows and sparkles. It is certainly, the most charming variety of the whole Arbor Vitæ family.

A strong and vigorous grower usually attaining a height of 15 to 18 feet, forming a handsome narrow pyramidal tree, the lower branches resting on our foundation. It is another of our rare specimen trees, trimmed and trained to a neat pyramidal form. This variety can be planted anywhere with entire success and is absolutely hardy.

THUYA GLOBOSA NOVA, “NEW” ARBOR VITÆ. A very handsome variety that we imported from Holland and is one of the most attractive dwarf trees offered. Grows to perfect form, with dense dark green foliage.

**Price**: Transplants Each 10
1 foot, B. & B. ............ $1.25 9.00

GOLDEN SIBERIAN ARBOR VITÆ. A fine hardy variety, growing to the same perfect globe form as the green Siberian. The beautiful, regular form of this tree is all that we could wish for in that respect and when to this is added a compact mass of dark golden color, we do not know of anything more desirable. Its rapid growth and perfect globe form, broad at the base tapering to a narrow pyramid, gives us a tree of decided attractiveness. Grows 8 to 10 feet tall, always retaining its soft golden hue. Our Golden Siberian Arbor Vitæ, are clipped specimens, trimmed to perfect form with dense foliage.

**Price**: Transplants Each 10
4 to 5 feet, sheared specimens B. & B. ............... $6.00 55.00

THUYA STANDISHI (Japanese Arbor Vitæ). A remarkable variety forming a drooping conical tree about 16 feet in height with rather an open head, the habit of the branches being somewhat pendulous, drooping gracefully. The form is even and regular, with foliage of a wonderful rich dark green color, which is brightened by a peculiar glossiness on the upper surface. A tree of great beauty. It is planted extensively upon lawns and in ornamental groups, being entirely hardy.

**Price**: Transplants Each 10
2 foot, B. & B. .............. $2.50 22.50

TAXUS CUSPIDATA (Japanese Yew). A native of Japan, where it grows wild upon the mountain sides and scarcely ever exceeds several feet in height. A most attractive, hardy, and desirable variety, and of all rare Japanese species this certainly is the best. In form it is somewhat similar to the Yew, growing mostly with the same spreading habit, and with numerous slender branchlets densely clothed with foliage of deep green, interspersed with bright red berries in Summer.

**Price**: Transplants Each 10
2 to 3 feet, B. & B. ............ $3.00 27.50

TAXUS WASHINGTONIA. A superb variety and one of the most beautiful of its family, for lawn and garden planting. It forms a neat upright little tree and has foliage of a bright golden hue.

**Price**: Transplants Each 10
1 to 1½ feet. (Extra Sheared) ............ $2.00 18.50

2 Alcock’s Spruce, trans. .... 6 to 10 inches
2 Oriental Spruce, trans. .... 10 to 12 inches
1 Killarney Rose,
Swiss Stone Pine.

A handsome hardy species, that was introduced into cultivation about the year 1746, from the highest regions of the Alps, between 4,000 and 6,000 feet elevation. It forms a handsome regular tree, clothed with branches to the ground, very dense in its growth and hardy enough to withstand the most exposed situations. Pine for use as a single specimen, and admirable for mass or group plantings as its dark foliage is striking and forms a splendid contrast with other varieties. An excellent quality in the Swiss Stone Pine is its ease of adaptability to almost all kinds of soils and situations. A medium fast grower and at maturity reaches a height of 25 feet. A most commendable variety both for its beauty and utility.

**Price:**

- Transplants Each
  - 10: $2.50
  - 100: $1.25
  - 8 to 12 inch: $0.35

  - 4 to 5 feet: $2.50
  - 5 to 6 feet: $2.00

Abies Veitchii.

This handsome new variety was discovered by J. H. Veitch, high up in the mountains of Japan. It is a rare and magnificent tree of remarkably symmetrical habit naturally growing to a straight narrow pyramid, of delightful outline. It is almost impossible to describe fully this marvelous beautiful of all Firs. People are simply amazed at its grandeur. The foliage is a mass of sparkling silver and deep dark green. The pretty little needles which entirely cover each branch are about one-inch long, the upper side being green and the underside silvery blue. Such a remarkable combination of color is rarely seen on cut of door trees, but this one is absolutely hardy, and not affected in any way by extremes of heat or cold. A moderately fast grower and soon develops into large beautiful specimens. Our stock is extra choice, being all grafted, and of perfect form and color.

**Price:**

  - 2 to 3 feet: $2.50

Golden Retinospora.

Sometimes called Japanese Cypress. Clothed in a mass of gorgeous golden foliage, so dainty and attractive that it adds beauty and splendor to its entire surroundings. If planted on rich soil in a somewhat protected location they develop to their highest type of beauty, both in form and color.

**Price:**

- Transplants Each
  - 3 foot, B. & B.: $2.50

Green Retinospora.

The foliage is delicate, feathery and fernlike. Grows naturally to globe shape. Its appearance is improved by annual shearing. These attractive little Evergreens show to the best advantage when planted in front of shrubbery or beside other Evergreens.

**Price:**

- Transplants Each
  - 3 foot, B. & B.: $3.50

This department includes trees of varieties which drop their leaves in Winter. Their uses are manifold, the more important being the beautification of landscape, shade and shelter. No garden or landscape is complete without them. Plant a few of these on your lawn, dooryard or bank and you will be surprised how they will enhance and beautify your property. The trees offered below are all select straight specimens and fully uphold the reputation of all "Dundee Grown" stock.

**Maples.**

One of the most widely known class of trees and the most valuable. We offer three varieties of Maples—the best. For grace of form, beauty of foliage and graceful shade no tree can excel the Maple, and the purple-leaved varieties are simply superb. In all cases where diameter is given the tree is measured at the base. Value for money received is our watchword.

**NORWAY MAPLE.** Handsome round headed trees, and excellent for lawn, tree banks, etc., where a spreading tree is wanted. Medium fast grower with broad green leaves which turn pale yellow in Autumn. (See illustration.)

**Willows.**

Besides the beauty of their airy Summer foliage, the Willows have a distinct value in the brightness of their bark when the leaves have fallen. They grow fast and do well on all soils.

**GOLDEN BARK WILLOW.** The bright golden bark of this variety makes it strikingly attractive, especially in the Winter. It makes a very pretty tree with its graceful drooping branches.

**Tea's Weeping Mulberry.**

The most beautiful weeping tree of recent introduction. The slender branches grow downward with the stem, forming an umbrella-like shape and a dense canopy which can be used as a playhouse for the children. Planted on a straight stem 6 to 8 feet high its branches sweep the ground, forming a beautiful tent of green. The foliage of this attractive tree is both graceful and beautiful. The most popular arrangement for planting is to place one on each side of the walk leading to the house. One or more of these trees should be on every lawn. (See illustration.)

**American Linden.**

We make a specialty of this marvelous tree, as it is one of the handsome native trees we have. Its large leaves and rapid blossoms, together with its dense spreading habit of growth, make it valuable as a lawn tree as well as for street and avenue planting. The Linden grows fast, forming shapely trees and casting a dense cool shade. (See illustration.)

*Samuel Mitchel, Thimandrop, W. Va.*
Hill's "Ideal Collection," Price $2.00.

In our vast collection of hardy Evergreens, Ornamentals, Shrubs, etc., we do not think there are any which have achieved greater popularity, or whose splendid qualities are so widely appreciated as the six varieties offered here. Such splendid value as this collection offers is really rare to find. These trees will quickly develop into large noble specimens, and provide all the shade and protection your place will need. This stock is all Hill's Best Quality.

1. 3 White Birch, 3 to 4 feet. 2 Magnolia Acuminata 1½ to 2 feet.
2. 3 Norway Maple, 4 to 5 feet. 3 Catalpa Speciosa 2 to 3 feet.
3. 2 American Elm, 3 to 4 feet. 2 Pin Oak, 3 feet.

---

**Birch.**

**WHITE BIRCH.** See reproduction in colors on outside cover page. This tree is a rapid grower with beautiful spray-like branches. The white paper like bark is especially attractive when planted among Evergreens, the bark being smooth and of a creamy or ivory whiteness. It grows to be a large tree 60 feet high.

**CUT-LEAVED WEEPING BIRCH.** This is the favorite of all trees for lawn and cemetery planting. Its graceful drooping branches and delicate leaves together with its silvery white bark so characteristic of the Birches, all combine to make it the most popular tree grown. It should be on every lawn.

| Price: | 6 to 8 feet $1.25 each; per 10 $11.00. |

**BLACK WALNUT.** This majestic tree grows to great size. Has rough dark bark and beautiful foliage. The nuts of this tree are in great demand and bring high prices.

**MAGNOLIA ACUMINATA.** A wonderful tree, grows 75 feet tall. In mid-summer large creamy white blossoms appear among its deep green leaves. A grand avenue tree. Foliage bright yellow in Autumn.

| Price: | ½ to 2 feet, 25 cents each; per 10, $2.00; 10 to 12 feet (extra), $6.00 Each. |

**MAGNOLIA SOULANGIANA.** A rare hybrid, grows to twenty feet tall and famous for its large white blossoms, rose purple without and soft pink within. A magnificent variety.

| Price: | Each | ¾ feet, B. & B. | $2.25 | $20.00 |

---

**Elm.**

**AMERICAN WHITE ELM.** The grandest and most picturesque of all American trees, and doubtless so well known that a lengthy description is needless. This tree is adapted for every purpose, being used for street, park, boulevard and lawn planting, developing into trees of immense size of graceful drooping form. See illustration.

**Ash.**

**EUROPEAN MOUNTAIN ASH.** A very pretty tree with abundant clusters of large orange berries in Autumn. It is already well known and highly esteemed as one of the most beautiful trees that grow. A vigorous grower and will add much to the beauty of your home.

| Price: | 8 to 10 feet, each $0.75; per 10 $6.00. |

**AMERICAN WHITE ASH.** Rapid grower attaining height of 120 feet. Will furnish quick shade, which makes it popular for lawn or tree-bank planting. Have straight clean trunks, smooth gray bark and glossy leaves.

| Price: | 6 to 8 feet, each $0.40; per 10 $3.50. |

**OAK-LEAVED MOUNTAIN ASH.** A tree of pyramidal habit of growth and has deeply lobed oak-like leaves, green above and woolly underneath. Very popular.

*Dear Sir: I received the trees all right and they are very fine. I am very pleased.—Anton Belot, Bushton, Kansas.*

---
The Oaks are known from the Atlantic to the Pacific, and as a practical tree for all purposes they are unsurpassed. For wide lawns, Parks, public grounds, avenues, etc., few trees are so majestic and imposing. Our soil and climate here is especially adapted to the culture of Oaks—in fact the native timber in the beautiful Fox River Valley in which our Nurseries are situated—consisted at an early date entirely of Oak. We plant annually many hundred bushels of Acorns to supply the immense demand. For prices on seedlings see page 35.

**AMERICAN RED OAK.** The King of Oaks for commercial as well as ornamental purposes. It is a distinct native American variety. A rapid grower with large foliage which turns a purplish scarlet hue in the Autumn. For ornamental purposes it is unsurpassed. From the illustration note what a beautiful street tree it makes, and so strong, sturdy and upright looking, growing to unusual proportions from 90 to 100 feet tall, living to centuries old. A most beautiful object on the lawn.

**Price:** 6 to 8 feet, each, $0.75; per 10, $6.50

**PIN OAK.** An ideal street tree. It is distinguished by its elegant growth, and the drooping tendency of its limbs, and fine deeply-cut foliage, which, in Autumn colors brilliantly. It grows faster and develops the family characteristics earlier than most Oaks, as may be seen from some fine avenues planted within the last score of years. It grows 60 to 80 feet, sometimes taller.

**Price:** 3 feet, each, $0.20; per 10, $1.50; 6 to 8 feet, each, $1.00; per 10, $9.00.

---

Dear Sir: The trees are here they are a fine lot. I am more than pleased, I want to thank you for the extras.—W. H. Gumm, Laup City, Nebr. (5-4-09)

Dear Sir: The trees arrived here in good condition. Will want more next season. The trees I got from you last year are doing fine in this dry country.—Geo. Stradl, Colby, Kansas. (5-10-09)

Dear Sir: Trees arrived in good shape and are very satisfactory.—Geo. W. McAdam, Vanderbilt Bldg., Tarrytown, N. Y. (4-29-09)

Dear Sir: I received the trees yesterday and have this to say, I have handled trees by the thousands and never found trees put up in such fine shape before. Thanks for premium.—E. Sanders, Morrill, Kansas. (5-1-09)

Dear Sir: Trees received in first class condition. Your bill will be presented to board for approval at next meeting.—Wm. Allen, Supt. The Homewood Cemetery, Pittsburg, Pa.

**SPECIAL OFFER No. 110. PRICE $1.25**

1 Red Oak 6 to 8 feet; 2 pin Oak 3 feet; 2 Norway Maple 4 to 5 feet.

Note: Trees on tree-bank should not be planted closer than 25 foot apart.
Chestnuts.

HORSE CHESTNUT. In May it is covered with magnificent erect spikes or pyramids of white flowers. As a single tree it has no equal. The foliage is large and dense, and it bears large brown nuts. Our trees are stocky and strong and will soon develop into beautiful large specimens. They are much planted along roads and in parks and private grounds. Grows to 60 and 80 feet tall, and has no superior as a specimen flowering tree. They are hardy, vigorous, free from insects and are among the first trees to unfold their leaves in Spring. (See illustration.)

Catalpas.

We offer two varieties of the Catalpa family—the Hardy Catalpa Speciosa, and the Catalpa Bungeii. The Catalpa Speciosa is mostly valuable because of its popularity along commercial lines, although when planted on lawns it makes a very ornamental tree. The Catalpa Bungeii is primarily an ornamental tree and is very striking.

CATALPA SPECIOSA. This valuable tree is a rapid grower. The foliage is of a light green color, with flowers two inches broad. It blossoms in June. Its seed pods are from ten to eighteen inches long. It is getting more popular each season because it has such pretty leaves and flowers.

CATALPA BUNGEII. The illustration gives a better idea of what this wonderful tree is than any description we could give. Of Chinese origin. The tops are grafted on straight stems, forming a pretty dome-shaped head of great soft heavy leaves. To get best effect plant along both sides of a driveway. The demand for these trees has been growing by leaps and bounds and they are now planted all over the country except in some extremely cold parts. It does not become scraggy but keeps its round headed, straight bodied appearance always. Single specimens planted on lawns attract great attention. If you really want something out of the ordinary and different from anything your neighbor has, you ought to have Catalpa Bungeii.

Poplars.

Poplars are more easily and quickly grown than almost any other tree, and thrive in nearly all soils. Their leaves are bright and their tops thin, fitting them for numberless purposes.

CAROLINA POPULAR. An extremely rapid grower, and desirable where quick shade is wanted. It seemingly thrives just as well on poor soil as it does on rich, and grows into a fine shaped spreading tree. Showy and cheery from the constant movement of its glossy, silver-lined leaves, yet always casting a dense cool shade. Much used for sub-division planting, being of quick growth commendable and economical. The demand for this tree is enormous and it well merits its popularity.

Hill's Extra Fancy Ornamentals.

**RIVER'S PURPLE-LEAF BEECH.** Sometimes called River Blood Leaf Beech. A wonderfully beautiful tree and comparatively new, and without doubt one of the most valuable additions to our Ornamental Department that has been added for many years. They grow into large noble specimens and the leaves or foliage, which has made this tree famous, are a deep rich purple blood color. It is marvelously beautiful and every one wants it at sight. It grows into a dense compact, perfectly formed tree.

**Price:**

- Each Transplants 10
  - 3 to 4 feet ................................ $1.00  $9.00
  - 4 to 5 feet ................................ 1.25  11.00
  - 10 to 12 feet 2 inch diameter, fine specimens 5.00  47.50

**BECHEL'S SUPERB DOUBLE FLOWERING CRAB.** This charming little tree, in early Spring, is one mass of bloom. Its wonderful fragrant flowers, of a white pinkish color, are a sight to behold. From a distance the flowers have the appearance of small Roses. From illustration you can see how beautiful this tree is when in bloom. Attains height of 20 feet.

**Price:**

- Each Transplants 10
  - 3 to 4 feet ................................ $0.75  $7.00

**SCHEIDECKERI FLOWERING CRAB.** A new variety with fragrant flowers, blush-pink changing to white. Opens early in May.

**Price:**

- Each Transplants 10
  - 3 to 4 feet ................................ $1.00  $8.00

**VEITCH'S FLOWERING CHERRY.** An elegant new variety and a distinct ornamental tree. It grows gradually, has glossy foliage and has long boughs of very double milk-white fragrant flowers in May succeeded by clusters of fruit which resemble Black Currants. Any one who enjoys beautiful trees will immediately fall in love with this one. You can plant nothing on your grounds which would attract more attention than this charming Flowering Cherry. Fine pyramidal plants with ball of earth.

**Price:**

- Each Transplants 10
  - 3 to 4 feet ................................ $1.50  $13.50
  - 4 to 5 feet ................................ 1.65  15.00

**PURPLE-LEAVED PLUM.** This wonderful little tree, of Persian origin, is covered with a mass of deep crimson purple colored foliage. The branches and twigs are a rich glossy black, which together with its splendid habit of growth makes it one of the most delightful trees for lawn planting we have. Grows 25 feet tall.

**Price:**

- Transplants Each 10
  - 4 to 6 feet ................................ $0.50  $4.50

**CAMPBELL'S WEEPING ELM.** A marvelously beautiful specie. A decided weeper. **Price:** 4 yr. heads 6 foot stems $5.00 each; per 10, $40.00.

---

**General Directions for Planting.**

Dig holes in the first place, large enough to admit the roots of the tree to spread out in their natural position; then, as before directed, let one person hold it in an upright position, and the other shovel in the earth, carefully putting in the finest and the best from the surface among the roots, filling every interstice, and bringing every root in contact with the soil. When the earth is nearly filled in, a pail of water may be thrown on to settle and wash in the earth around the roots; then fill in the remainder and tread gently with the foot. The use of water is seldom necessary, except in dry weather, early in the Fall or late in the Spring. Guard against planting too deep; the tree, after the ground settles, should stand in this respect as it did in the Nursery. In very dry gravelly ground the holes should be dug twice the usual size and depth and filled in with good loamy soil.

**Dear Sir:** It gives me great pleasure to thank you in behalf of the University for the fine trees you sent.—Robt. W. Holt, Lehigh University, So. Bethlehem, Pa.
Ornamental Flowering Shrubbery.

Nothing adds more to the beauty of a place than to have the sides and background well filled with groups of shrubbery. Whether you have a lawn of many acres or an humble dooryard, we commend this class of plants as indispensable to the real beauty of your home. If you select with care you can have a succession of bloom from April till Snow, to say nothing of the beautiful color, form and shadow effects of flowers, foliage and bright berries. It is our aim to produce everything in Flowering Shrubbery that is useful, hardy and worthy of cultivation in all climates. To no department do we give more attention than to our Shrubbery Department. And furthermore in no class of plants is there so much room for wide variations in quality. Our shrubs are grown with plenty of fibrous roots, but a large strong healthy top. In planting shrubbery, prepare the ground and maintain it as if for a crop of potatoes. Plant about four feet apart and mulch with straw or leaves. The time of bloom and height at maturity will be found under each variety.

**BEAUTIFUL WHITE DOUBLE FLOWERING SNOWBALL (Viburnum Opulus Sterling).** One of the most charming hardy flowering shrubs in existence. Bears great clusters of pure white globulous flowers, like real balls of snow. Covered with bloom for weeks in the Spring. Grows five to seven feet tall—entirely hardy, needs no protection, splendid for door-yard, lawn and cemetery planting. Has rich dark green foliage crinkled and not subject to insects or diseases; does well anywhere and is always sure to bloom. Blooms in May.

**Price:** Each 3 for 10 for
1½ to 2 feet ............... $0.25 $0.75
2 to 3 feet ............... .30 .80 2.50

Tree Form 4 to 5 foot stem ....... $1.25 $3.50

**HIGHLAND CRANBERRY (Viburnum Opulus).** A large growing shrub with beautiful white flowers which hang in clusters in late Spring and early Summer, followed by bright scarlet berries persisting all Winter. A very showy shrub and should be on every lawn. Grows 10 to 12 feet tall.

**Price:** Each 3 for 10 for
1 to 1½ feet ............... $0.20 $0.50
1½ to 2 feet ............... $0.25 $0.60 $1.50
2 to 3 feet ............... .35 .90 2.75

**WAYFARING TREE (Viburnum Lantana).** A valuable species with white flowers, followed by berries that become, pink, red and black in turn as they ripen. 20 feet.

**Price:** Each 3 for
1 to 1½ feet ............... $0.20 $0.50
2 to 3 feet ............... .30 .75

**THE BEAUTIFUL SPIREA VAN HOUTTI.** 5 to 6 feet high. Van Houtti's Bridal Wreath. A grand graceful shrub, entirely hardy and one of the most beautiful of all. Immense bloomers, pure white flowers borne in elegant plume-shaped clusters all over the plant as shown in illustration. Recommended for all kinds of outdoor planting; also excellent for hedge.

**Price:** Each 3 for 10 for
1½ to 2 feet ............... $0.20 $0.50
2 to 3 feet ............... .65 2.50
3 to 4 feet ............... .30 .80 2.50

**HILL'S CHOICE LAWN COLLECTION, SPECIAL OFFER NO. 112.**
One each of all varieties offered on this page, seven big strong selected shrubs, first size, Price $1.50.
Lilacs. (Syringa.)

Nearly everyone is fond of Lilac blossoms. Their sweet fragrance comes with the first breath of Spring, and their delicate color of blue and white seem like a legacy from our grandmother’s garden. They bloom in May and grow eight to ten feet in height. See cover illustration.

OLD FASHIONED PURPLE LILAC (Syringa Vulgaris). Strong, vigorous, upright growth with rich dark green foliage and large panicles of fragrant purple flowers.

Price: Each 3 for 10 for
1½ to 2 feet $0.25 $0.60 $1.75
2 to 2½ feet .30 .75 2.00

STANDARD WHITE LILAC (Syringa Alba). Same habit of growth as the Purple Lilac, but with pure white fragrant flowers.

Price: 1½ to 2 feet, each $0.25; 3 for $0.65; 10 for $2.00.

TREE LILACS. Grown to tree form with fine straight stems and nice round heads.

Price: 4 to 5 feet, each $2.00; 3 for $5.25.

Beautiful New Grafted Lilacs.

During the last few years many new varieties of Lilacs have been produced. We offer only those which have proven to be exceptionally valuable. The following are a distinct improvement on the old sorts and a trial will make you more enthusiastic over them than we are. As they can be produced only by long and careful process of grafting they are a trifle more expensive than the common sorts, but they more

than make up for it in their wonderful bloom.

SYRINGA-CHAS X. A wonderful plant. Color, dark lilac red. One of the most beautiful. Double white variety, very large. Free bloomer.

Price: Each 3 for 10 for
1½ to 2 feet $0.25 $0.60 $1.75
2 to 2½ feet .30 .75 2.00

HOLLY-LEAVED MAHONIA (Mahonia Aquifolium). A valuable Evergreen shrub which retains its green appearance all Winter. It grows to medium size with purplish shinning prickly leaves and showy bright yellow flowers in May succeeded by bluish berries. Price: 1½ to 2 feet, each 25c; 3 for 60c; 10 for $1.50.

JAPANESE MAHONIA (Mahonia Japonica). A new Evergreen shrub recently introduced from Japan. It has large distinct leaves and in the month of May it is covered with delicate yellow flowers which give it a striking appearance.

Price: 1 to 1½ feet, each 25c; 3 for 60c; 10 for $1.50.

Weigelias.

The Weigelias occupy an eminently place in the shrub family. They produce in June large superb trumpet-shaped flowers of all shades and colors from pure white to red. They make a broad vigorous growth. Five to eight feet in height. They flower after the Lilacs in June. See illustration on cover.

THE BEAUTIFUL ROSE COLORED WEIGELIA (Weigelia Rosea). An elegant shrub with rose colored flowers. It was introduced from China some years ago and sprang into instant favor. Include this in your order.

WEIGELIA EVA RATHKE. A splendid new variety and perhaps the handsomest yet produced. Purplish red flowers, with creamy white markings. Its growth is vigorous and it is found by many growers.

Price on Weigelias 1½ to 2 feet each $0.55; 3 for $0.65; 10 for $1.85.

WHITE FRINGE (Chionanthus Virginica). 8 to 10
feet. An extremely odd and beautiful shrub. In June the graceful lace-like white flowers hang in drooping panicles between the rich dark leaves. Price: 1 to 1½ feet each $0.30; 3 for $0.80; 10 for $2.50.

PURPLE FRINGE (Rhus Cotinus). 8 to 9 feet. An oldtime shrub or small tree of irregular habit. In Summer it is enveloped with a mass of fleecy purple bloom resembling smoke or mist. Price: 1½ to 2 feet, each $0.30; 3 for $0.75; 10 for $2.25.

HIBISCU-S-ALTHEA (Rose of Sharon). A very symmetrical, rapid growing flowering shrub. Very desirable because they bloom in August and September.

Price: 2 to 3 feet, each $0.30; 3 for $0.80; 10 for $2.50.

Hill’s Hardy Shrub Collection No. 113.

2 Spirea Van Houtii 1½ to 2 feet
2 Purple Lilac 1½ to 2 feet
2 White Lilac 1½ to 2 feet
1 Grafted Lilac (our selection) 2 to 3 feet
2 Rosea Weigelia 1½ to 2 feet
1 Highbush Cranberry 1 to 1½ feet

Ten best hardy shrubs

Price

$2.55

Cloth. $1.00
Hydrangea P. G.

FORTUNE'S FORSYTHIA (Forsythia Fortunel). One of the best of the Forsythias. Growth upright, foliage deep green and covered with beautiful bright yellow flowers.

Price: Each 3 for 10 for
1½ to 2 feet $0.25 $0.60 $1.75
2 to 3 feet .30 .75 2.00
GOLDEN ELDER (Sambucus Aurea). A handsome variety with yellow golden foliage, very striking. We have a few large specimens 4 to 6 feet high at 50 cents each.

Price: Each 3 for 10 for
1 to 1½ feet $0.20 $0.50 $1.50
2 to 3 feet .25 .60 1.00
3 to 4 feet .30 .75 2.00

Philadelphia (Syringa or Mock Orange).

We offer two varieties of the Mock Orange family knowing that each one is valuable and worthy of extensive planting, in fact, the Mock Orange has become indispensable in all lawn plantings.

GARLAND MOCK ORANGE (Philadelphus Grandifolia). A superb shrub, growing 8 to 10 feet tall. It blooms early and in very graceful sprays. Has pure white highly scented flowers, beautiful for cutting. Valuable for backgrounds, screens, groupings and specimens. In spite of the great number of new plants which have been introduced, the old Philadelphia holds its own and is more popular than ever.

Price: Each 3 for 10 for
1½ to 2 feet $0.30 $0.80 $2.50
GOLDEN MOCK ORANGE (Philadelphus Aurea). A striking shrub of medium size, with rich golden yellow leaves, that remain bright throughout the season. When planted in front of shrubs with green foliage the contrast is delightful. It forms a neat shapely bush and is without equal for attractiveness and brilliancy of foliage. See cover reproduction in color.

Price: Each 3 for 10 for
1½ to 2 feet $0.30 $0.80 $1.75

Hill's "Garden Collection" Special Offer No. 114.

Price $2.95.

Please note these shrubs are extra large and will give immediate effect. A wonderful collection.

2 Hydrangea P. G. 3 to 4 feet
2 Spirea Van Houli 3 to 4 feet
1 Highbush Cranberry 2 to 3 feet
1 Golden Elder 3 to 4 feet
1 Tree Hydrangea 4 to 5 foot stem
2 Killarney Roses
2 Trumpet Vines

Hydrangea P. G.

This is undoubtedly the grandest and most beautiful of all the hardy flowering shrubs for the door-yard and lawn. The illustration herewith gives some idea of its magnificent beauty. We guarantee our Hydrangeas to give abundance of bloom the first season. The flowers are rich creamy white, changing to pink and borne in immense clusters. It blooms in August, the first and every succeeding year, and continues to bloom for months. It is entirely hardy, too trouble to grow, and does well anywhere.

Garland Mock Orange.
A New American “Everblooming Hydrangea”

This new American Hydrangea is believed to be the most beautiful hardy flowering shrub introduced during the last twenty years. It was found growing wild in the rocky hills of Western Pennsylvania several years ago, and finally was introduced into central Ohio. From this introduction numerous plants have been grown and planted, so that many plants are now growing profusely from early June till toward Autumn frosts. The illustration is from a photograph of a three-year old plant, taken June 18, 1908. The plant which

New Everblooming Hydrangea (Hydrangea Arborescence Sterilis). A shrub of very pretty habit, and makes a delightful contrast with the Snowberry. The berries are a dark red and are borne in great profusion all over the bush. See color reproduction on cover.

Price: Each 3 for 10 for $0.60 $0.65 $0.70

JAPANESE BUSH HONEYSUCKLE (Lonicera Morrowii). A variety from Japan and valuable for its wonderful foliage and handsome red fruit. Admiredly adapted for ornamenting small or large grounds.

Price: Each 3 for 10 for $0.25 $0.65 $2.00

TARTARIAN HONEYSUCKLE (Lonicera Tartarica). Has pink flowers contrast beautifully with the foliage. This and the Japanese Bush Honey-suckle appear to fine advantage when planted together.

Price: Each 3 for 10 for $0.30 $0.80 $2.50

TREE HONEYSUCKLE. Grown on straight stems three to four feet, nice bushy tops. They form handsome tree-shaped plants, nicely headed.

Price: Each 3 for 10 for $2.00

Red Barked Siberian Dogwood (Corynus Siberica).

A rare and remarkable variety with bright red bark in Winter. Very attractive. In the Spring it is covered with a very small delicate pure white flower. The popularity of this shrub is universal as it does well all over the country.

Price: Each 3 for 10 for $1.20 $1.50 $2.00

JAPANESE BARBERRY (Berberis Thunbergii). One of the most beautiful shrubs in cultivation, either for hedging or general purposes. The plant is literally covered with bright scarlet berries in the Fall. Grows 4 feet tall. See cover.

Price: Each 3 for 10 for $0.20 $0.45 $1.20

PURPLE BARBERRY (Berberis Purpurea). Equally remarkable for its brilliant purple foliage and fruit. Valuable as a border, hedge, or as single specimens.

Price: Each 3 for 10 for $0.25 $0.45 $1.25

GREEN BARBERRY (Berberis Vulgaris). A handsome shrub suitable for lawn or hedge, with yellow flowers in May, followed by orange scarlet fruit.

Price: Each 3 for 10 for $0.15 $0.35 $1.50

STRAWBERRY TREE (Calycanthus Floridus). A desirable shrub. The wood is fragrant, flowers of a rare chocolate color. June.

Price: 1½ to 2 feet, each, $0.25; 3 for $0.65; 10 for $2.00.

BURNING BUSH (Euonymus Atropurpureus). Foliage bright red, flowers deep purpl.

Price: 4 to 5 feet, each, $0.35; 3 for $0.90; 10 for $2.50.

Hill’s “Gem” Collection.

Special Offer No. 115. 32 Best shrubs, big size for immediate effect as follows.

Price $5.00
HILL'S CHOICE
HERBACEOUS PEONIES.

The Peony is today without a rival as a hardy garden favorite and is quite naturally so, as no other hardy garden plant probably thrives as well with as little special care and produces so fine a display of gorgeous bloom. The great diversity of color ranging from pure white to dark red very much increases their value. Our strong hardy plants if planted in mellow rich soil will give a fine display of blossoms the first season. The Peony is unquestionably the finest herbaceous perennial in the world. It rivals the Rose and when you look at a good double one it is hard to see much difference. The three varieties which we offer give a wide range of color and are absolutely the hardiest and most popular varieties in cultivation today. Plant 3 feet apart.

FESTIVA MAXIMA. This is acknowledged to be the best white Peony in existence both in color and form. Of the purest white splashed with a few streaks of crimson in center.
Price: Each 3 for 10 for Large strong roots .... $0.95 $1.40 $4.50

RUBRA SUPERBA. Large, late, vigorous, sometimes called Red Festiva Maxima. Its bright red double blossoms are gorgeous and make a delightful contrast to the pure white of the Festiva Maxima.
Price: Each 3 for 10 for Large strong roots, .... $0.45 $1.30 $4.00

BEAUTIFUL HARDY CLIMBING VINES.

Flower lovers and gardeners know how indispensable are vines and climbers for beautifying one's place, especially near the house. Plant Clematis, climbing roses and honeysuckles about the front porches, with perhaps a vine or two of the Chinese Wisteria to climb as high as the roof. Stone or brick walls are always prettier when ivy clad.

Clematis Paniculata. Try this the most popular climbing vine we have. It is of very rapid growth, covering quickly trellises and arbors with handsome clean glossy foliage, which is that healthy green color that so few of this class of plants possess. The flowers are pure white, borne in immense sheets, almost completely hiding the foliage, and of a most delicate fragrance. It flowers in September when few other vines are in bloom. Price: 2 year No. 1 extra selected, Each $0.35; 3 for $1.00

Clematis Jackmannii. This variety, with its strong healthy growth, hardy nature and rich deep velvety-purple flowers, is extremely popular.
Price: 2 year No. 1 strong plants, Each $0.40; 3 for $1.10; 10 for $3.75

The Japan or Boston Ivy (Ampelopsis). The grandest of hardy climbing vines in existence, for covering houses, churches, schools, etc. Its glossy ivy leaves overlap each other, and its long delicate young shoots stretch up the walls or roofs with free rapid growth.
Price: 2 year No. 1 selected plants, Each $0.30; 3 for $0.85; 10 for $2.75

Purple Chinese Wisteria. A rapid growing tall vine with handsome foliage and flowers. The purplish pea-shaped flowers are profusely borne in immense drooping clusters 7 to 12 inches long. Price: Each 3 for 10 for 2 year No. 1 .......... $0.35 $1.00 $3.00

Hill's Japan Honeysuckle. One of the best climbing vines on the list. It is nearly evergreen, its foliage retaining its green color nearly all Winter. Its main feature is its beautiful yellowish white flowers, which are so deliciously fragrant as to be noticed for miles. Price: Each 3 for 10 for 3 yr. extra selected strong plants .... $0.30 $0.80 $2.75

Other Climbing Vines.
Am. Trumpet Vine. 3 yr. extra selected. 4 feet 25c each, 3 for 65c.
Dutchman's Pipe. 2 yr. 65c each, 3 for $1.80.
Kudzu Vine. Strong roots, 35c each, 3 for $1.00

Special Offer No. 116.
One each of the above climbing vines, extra selected plants, eight in all.
Price: ........................................ $2.65
Hill's “Quality” Roses.

In order to supply the increasing demand for Roses, we have enlarged our facilities and are now propagating on a more extensive scale than ever. Roses are the most important flowering shrub we have—the mere name is an inspiration to garden lovers. No home or garden is complete without them, no arrangement satisfactory that neglects them; in fact they are indispensable. Our immense stock and great variety of Hardy Roses enable us to furnish assortments adapted to various purposes, and intending purchasers are invited to examine our lists and whenever we can be of any assistance in making selections our services will be cheerfully given. Our plants are all large, strong field grown bushes, (not small insignificant mailing size stock) and they are absolutely guaranteed to make a sturdy growth, and produce a profusion of bloom the first season. It is the quality of our Roses alone which makes this guarantee possible. The fact that we ship our plants to nearly all the large estates throughout the country is proof positive of the quality of our stock.

Dear Sir: The shipment of Rose bushes arrived yesterday and I wish to take this opportunity of expressing to you my appreciation, not only of the high grade of the stock furnished, but also the excellence with which the package was prepared and the business-like way in which you handled the entire order. I have purchased a great many plants from different concerns in the past, but these were positively the finest I have ever received.—Hugh Munro, St. Paul, Minn.

Garden Hybrid Roses—Strictly Hardy.

This class of Roses bloom profusely in June and at intervals throughout the Summer and Fall. The popular hardy garden roses mostly belong to this class and are always satisfactory. Do not allow roses to suffer for want of plenty of fertilizer, as they are gross feeders, and only when they have plenty to feed on can they be expected to produce the best results.

**PARSONS ON THE ROSE.**

By Samuel B. Parsons

A treatise on the propagation, culture and history of the rose. New and revised edition. 5x7 inches. Cloth. $1.00
5 SUPERIOR GARDEN HYBRID ROSES.

The Cream of This Splendid Class.

GARDEN HYBRIDS (Continued).

PAUL NEYRON. A magnificent rose. The largest and finest of all. The flowers are immense; color of bright shining pink; clear and beautiful; very double and full; finely scented. Blooms the first season and all Summer. No collection is complete without this wonderful variety.

MAGNA CHARTA. An old favorite. Large double flowers. Rosy red flushed crimson.

MRS. JOHN LAING. Soft pink, of beautiful form, exceedingly fragrant and a remarkable bloomer.

JULES MARGOT-TIN. Cherry red. Splendid form.

JOHN HOPPER. An excellent rose; hardy and abundant bloomer; solid and regular flowers, perfectly double, clear bright rosy pink, very fragrant.

MADAME GA-BRIEL LUIZET. Coral-rose, suffused with lavender and pearl. Superb. (Budded).

MAD. PLANT-IER. Pure white. large double. Extremely hardy and strong growing.

MARSHALL WILDER. Large, well-formed; color, cherry carmine.

PRINCE CAMILLE DE ROHAN. Rich crimson-maroon, almost black. Large and full.

ULRICH BRUNNER. Rich glowing crimson, flamed scarlet. Large, full; long stemmed. Hardy.

Make a Beauty Bed of Choice Everblooming Roses.

Think of the joy of having a beautiful bouquet of roses on your table, fresh ones almost every day throughout the Summer. These are the kind of roses you want.

HILL’S “BEAUTY BED” COLLECTION.

10 Roses, selected from the above eleven varieties, our selection. Enough to fill a bed 6x10 feet. Plant three feet apart. Large sized bushes, to go by Express. Price $2.95.

HYBRID TEA ROSES.

Very free bloomers; hardy with slight protection. These delightful, delicately formed fragrant roses are very popular as they bloom profusely all the growing season, and are ideal in form, color, fragrance and foliage.

BABY RAMBLER. The rose hybridists certainly made a remarkable happy combination when they succeeded in creating this wonderful new rose. Imagine a bushy rose just right for the flower garden or a pot plant as to size, with all the beauty and color and great clusters of the Crimson Ram bler, and add to this that it will bloom constantly all Summer. Perfect in form and color.

CLOTHILDE S OUPERT. Known the world over as one of the best of all roses. Blooms absolutely all Summer and until late in the Fall until stopped by frost. Medium size; very double and beautifully imbricated, produced in clusters; pearly white. Price: 1 year plants, each, 10c; 3 for 30c; 10 for $1.25; 100 for $15.00.

KAISERIN AUGUSTA VICTORIA. An exquisite white variety faintly blended with cream color; very large, full and double, almost perfect in form.

ROSA CAEMMINUS. A magnificent bedding variety. Color of a bright gorgeous pink, blooms continuously until late in the Fall. One of the best. Planted extensively in European rose gardens.

LA FRANCE. Delicate silver rose, changing to silvery pink; very large, full, of fine globular form; a most constant bloomer.

MME. ABEL CHATENAY. Superb; free-blooming; the best of its color; rosy carmine, shaded darker. A grand grower. Hardy.

Price of Hybrid Tea Roses.

(Except where noted)

Very strong field grown. Each 40 cents; per 10 $3.50; per 100 $35.00.

Special Offer No. 120.

1 each of above six varieties, 6 big strong bushes.

Price...........................................$1.95
The Magnificent Irish Rose Killarney.

This queen of the Irish Roses excels any other of its class and color yet introduced, and by many it is recognized as the most beautiful, hardy, ever-blooming Tea Rose now under cultivation. Each season since it has been introduced, Killarney, has increased in popularity, and the demand has always exceeded the supply. Killarney originated in Ireland, near the shore of the historical lakes for which it is named and it does honor to the reputation of the home of its birth. The plant is strong and upright, with beautiful deep green foliage of a bronze tinge, and the rose is entirely free blooming, bearing immense long pointed buds and massive flowers on heavy shoots. The color is deep brilliant sparkling shell-pink, of the most exquisite shade. The flowers are of delightful fragrance, immense size, and have thick petals of great substance. It is without doubt the most wonderful rose ever produced, and every lover of roses should embrace this opportunity to secure extra fine plants at a reasonable price.

**Hill’s 5 Best Climbing Roses.**

These climbing roses have become immensely popular because their remarkable merits entitle them to a place in every garden. The rose-loving public is gradually awakening to the fact that this class is almost indispensable for home planting. All bloom with great freedom, and there is scarcely a day during the growing season that they are not blooming. And such masses of flowers! They are simply exquisite and it is difficult to say which is the prettiest. Certain it is that of all roses, Climbing Roses are among the cheapest, best and most satisfactory for general planting. Here are offered the best now in cultivation.

**CRIMSON RAMBLER.** The most popular Climbing Rose in cultivation, and deservedly so. In all parts of the country during June and July, this gorgeous crimson Climbing Rose can be seen in great glory, and the demand increases for it each year. It is most correctly termed "The Flower of the masses." These plants attain a height of ten to twenty feet in a single season, producing in wonderful profusion large trusses of deep glowing crimson flowers. When in full bloom it presents a vivid mass of crimson beauty. It is absolutely hardy everywhere.

**Price:** Strong 2 year No. 1 selected plants, each $0.50; 3 for $1.35; 10 for $4.00.

**DOROTHY PERKINS.** This is a grand new variety so hardy as to withstand the most severe Winters with impunity. Grows ten to fifteen feet in a season. Flowers are perfectly double with petals crinkled and are borne in clusters of ten to twenty that cover the bush for several weeks in the Spring. Blooms just in time for June weddings, and because of its abundance of bloom is a most valuable rose for cutting for cutting and decorating.

**QUEEN OF THE PRAIRIE.** Bright rosy red frequently striped with white. Very large, compact and beautiful. Will thrive in any part of the United States and should be in every collection.

**Baltimore Belle.** A wonderful new variety, lately introduced from Europe. Very rare. A perpetual bloomer. Very vigorous. Color fiery red. **Price:** $1.00 each.

**Special Offer No. 121.**

**Strong Plant:**

Price $1.55.
FRUIT TREES
SMALL FRUITS, GRAPE VINES, STRAWBERRIES, ETC.

Do you know the secret of growing big crops of large luscious fruit? To be successful you must, above all things, start right. Get large strong, healthy standard sized stock. This applies to small fruits, just as much as it does to Apple, Cherry, Peach, Pear and Plum trees, etc. Our principal stock of fruit trees, small fruits, etc., embrace only those varieties which have been well proved, and can be recommended as the best now in cultivation. We cannot attempt to give complete directions on all points connected with tree planting, but simply mention a few hints on the more important operations. Everyone who purchases, should, if possible, put himself in possession of "Successful Fruit Culture" (see Page 30) in which will be found directions in regard to Fruit growing. Transplanting is to be considered under the following heads:

1st. The Preparation of the Soil. For fruit trees the soil should be dry, either natural or made so by thorough drainage, as they will not live or thrive on a soil constantly saturated with stagnant moisture. It should also be well prepared. On new, fresh lands, manuring will be unnecessary; but on lands exhausted by cropping, fertilizers must be applied, either by turning in heavy crops of clover, or well decomposed manure or compost. To insure a good growth of fruit trees, land should be in as good condition as for a crop of wheat, corn, or potatoes.

2nd. The Preparation of the Trees. In regard to this important operation, there are more fatal errors committed than in any other. As a general thing trees are planted in the ground precisely as they are sent from the Nursery. In moving a tree, no matter how carefully it may be done, a portion of the roots are broken and destroyed, and consequently the balance that existed in the structure of the tree is deranged. This must be destroyed by proper pruning, adapted to the size, form, and condition of the trees, as follows:

STANDARD ORCHARD TREES. These, as sent from the Nursery, vary from five to seven feet in height, with naked stems or trunks, and a number of branches at the top forming a head. These branches should all be cut back to within three or four buds of their base. This lessens the demand upon the roots, and enables the remaining buds to push with vigor. Cut off smoothly all bruised or broken roots up to the sound wood. In case of older trees of extra size, the pruning must be in proportion; as a general thing it will be safe to shorten all the previous year's shoots to three or four buds at their base, and where the branches are very numerous some may be cut out entirely.

3rd. Staking. If trees are tall and much exposed to the winds, a stake should be planted with the tree, to which it should be tied in such a manner as to avoid chafing. A piece of matting or cloth may be put between the tree and the stake.

4th. Mulching. When the tree is planted throw around it as far as the roots extend, and a foot beyond, five or six inches of deep rough manure or litter. This is particularly necessary in dry ground, and is highly advantageous everywhere both in Spring and Fall planting. It prevents the ground from baking or charring, and maintains an equal temperature about the roots.

5th. After-culture. The grass should not be allowed to grow around young trees after being planted, as it stunts their growth. The ground should be kept loose and clean around them, until, at least, they are of bearing size.

APPLES.

The Apple is properly termed the "King" of all fruits. It is being planted much more extensively than at any time in its history. Our assortment is as complete as it is possible to make it. The following list includes all the varieties that are planted for commercial purposes and also those which are usually confined to the home fruit garden.

SUMMER APPLES.

RED ASTRACHAN. Large, roundish, nearly covered with deep crimson, over-spread with a thick bloom, very handsome, juicy, good though rather acid. The tree is very hardy, a free grower, with large foliage, and a good bearer; highly esteemed on account of its fine appearance, earliness and hardness. Valuable for all purposes, and fruit of best quality. August.

DUCHESS OF OLDENBURG. A large beautiful Russian Apple; roundish, streaked red and yellow; tender, juicy and pleasant. A kitchen apple of best quality and esteemed by many for dessert. Medium early. Trees hardy, vigorous and abundant bearers. A most valuable sort for market as well as domestic use, always bringing top prices on the market.

YELLOW TRANSPARENT. A Russian variety. Tree hardy and a strong grower and an unusually early bearer. Fruit pale yellow, good size and quality; skin clear white at first, turning to pale yellow when fully ripe. Our experience with this variety is very satisfactory. We have found it the earliest of all Apples. Of a mild, pleasant yet sprightly flavor. It bears abundantly and at extremely early age. Two year trees in the Nursery row frequently produce fine fruit. Ripens about Aug. 1st. It should be in every home garden on the American Continent.

HILL'S TREES are best by over half a century's test.
FALL APPLES.

For Price on Apples, See Page 29.

WEALTHY. A very valuable variety, and generally acknowledged to be the best on the list. Succeeds everywhere because exceptionally hardy. Fruit large, red, fine and juicy. From three to four years from planting, will bear from one-half to two bushels per tree. Tree very thrifty, a free grower, and the most productive of all. A good keeper, and famous for its beauty and delicious flavor. Has been planted extensively in commercial orchards for many years, but is also extremely valuable for home fruit garden. Ripens medium early.

PAMEUSE (Snow Apple). Medium size, deep crimson in color. Flesh snowy-white tender, melting and delicious. Tree vigorous with dark wood. A fine dessert fruit; valuable for market. Succeeds well anywhere, but particularly in the North. November to January.

MAIDENS BLUSH. Medium size; flat, pale yellow, highly colored on the side exposed to the sun; flesh tender, sprightly and sub-acid. A fine rapid growing tree, productive and a fine variety for the homestead. Ripens early in September to October.

FALL PIPPIN. Very large, roundish, oblong, yellow, rich and delicious. Tree a free grower, spreading and fine bearer. An admirable baking apple.

WINTER APPLES.

BEN DAVIS. A large roundish, handsome yellow, overspread or splashed with red; flesh, white tender, juicy, and sub-acid. A very popular apple in the West and Southwest. December to March.

GOLDEN RUSSET. Medium size, of a beautiful, clear, golden, russet; very tender, juicy and rich, a thrifty upright grower and excellent bearer. A most hardy and valuable variety. November to April.

GRIMES GOLDEN. Medium to large size, round rich golden yellow, sprinkled with light gray dots; flesh crisp, tender, rich and juicy, sprightly. Tree hardy vigorous and productive. January to April.

JONATHAN. Of medium size, color red and yellow. Flesh tender, juicy and rich. A moderate grower. Very productive. One of the very best varieties either for table or market, and on account of its many sterling qualities and great beauty, it is undoubtedly the most popular apple today.

PEWAUKEE. Fruit medium to large. Skin bright yellow, striped and splashed with red. Juicy, sub-acid flesh; rich aromatic flavor. Esteemed especially for cold climate on account of its hardness.

TOLMAN'S SWEET. Medium size. Pale whitish yellow, slightly tinged with red. Flesh firm, rich and very sweet. Excellent for cooking. Tree a free grower, upright and very productive.

YORK IMPERIAL. Medium, whitish shaded with crimson in the sun. Firm, crisp, juicy, pleasant, mild, sub-acid. Tree moderately vigorous and productive.

NORTHWESTERN GREENING. Fruit large, round, conical. Color greenish yellow. Flesh white. Tree splendid grower and hardy as Wealthy.

CRAB APPLES.

Price Same As Other Apples.

The improvements in the varieties of Crab Apples have kept pace with other kinds of fruits. A few years ago it was thought fit only for cider, preserves and jelly, but there are varieties now that command a good price on the market for dessert purposes. Ornamental when in bloom and when loaded with highly colored fruits. They are entirely hardy, and do well in any kind of soil in the most exposed situations. They come into bearing very early, generally the second year and bear every year. They are unequaled for jelly, and can be dried, cooked, canned and preserved with the skin on, thus saving work.

WHITNEY No. 20. Large, averaging 1½ to 2 inch in diameter. Smooth, glossy, green splashed with carmine. Flesh firm, crisp and rich. A great bear and hardy.

HYSDROP. Large size. Dark crimson with bloom very showy and most beautiful of all the class. Very hardy, and a most valuable variety.

SUCCESSFUL FRUIT CULTURE. A practical guide to the cultivation and propagation of fruits. By Samuel F. Maynard. Illustrated. 274 Pages, 5x7 inches, cloth................................. $1.00
PEARS.

The following list includes most of those which have been well tested and proven valuable.

**GATHERING PEARS.** One of the most important points in the management of Pears is to gather them at the proper time.

Summer Pears should be gathered at least ten days before they are ripe, and Autumn Pears, at least a fortnight. Winter varieties, if they will hang so long, may be left until the leaves begin to fall. **Thin the fruit.** We cannot urge too strongly the following suggestion; when pear trees are heavily laden the fruit should be thinned when about one-third grown; else the fruit will be poor and the trees injured.

**Price of Pears**

**SUMMER PEARS.**

**BARTLETT.** One of the best and most popular. Large; yellow and red; juicy, buttery, ripening in September.

**CLAPP'S FAVORITE.** A splendid Pear, resembling the Bartlett and ripening a few days earlier. The tree is hardy and vigorous.

**AUTUMN PEARS.**

**FLEMISH BEAUTY.** A large beautiful melting sweet Pear. The tree is very hardy, vigorous and fruitful.

**KEIFFER.** Very large; skin rich golden yellow; an early and great yielder. Ripens in November.

**WINTER PEARS.**

**ANJOU.** A large handsome Pear with good flavor. Keeps into mid-winter. Tree a vigorous grower and good bearer.

**IDAHO.** A native of Idaho. Yellow with red cheek, covered with spots. The shape is more that of an oblong apple than a pear.

**DWARF PEARS.**

We can furnish Bartlett, and Anjou, on dwarf stock. Dwarf Pears are grown on Quince stock and come into bearing sooner than the standards. Strict attention to them and high cultivation will result in a magnificent yield of fruit. **Price** on Dwarfs are the same as standards.

**CHERRIES.**

Cherries are of a rapid growth, producing large crops of luscious sweet fruit. We know of nothing in the fruit line that has given or promises to give in the future larger returns than the cherry orchard.

**EARLY RICHMOND.** Medium sized; dark red; juicy, rich acid flavor. A very large and sure bearer. One of the most valuable and popular cherries we have. A grand market cherry and every home orchard should include the Early Richmond. Does well everywhere.

**MONTMORENCY.** A cherry of the Richmond class, but larger and more solid. Ripens from ten to twelve days later than the Early Richmond.

**ENGLISH MORELLO.** Fruit large; dark red, nearly black; tender, juicy, sub-acid; valuable for preserves; tree small, slender growth; very productive.

**Hill's "Home Orchard" Collection.**

Special Offer No. 122. Price $5.00.

2 Duchess Apple 5 to 7 feet 1 Jonathan Apple 5 to 7 feet
2 Wealthy Apple 5 to 7 feet 2 Keiffer Pear 5 to 7 feet
5 Early Richmond Cherry 4-6 feet 2 Abundance Plum 4-5 feet

**DO NOT CONFUSE** the price of Hill's standard Fruit trees with the cheap prices quoted by some on seedlings or small mailing size trees. Hill's trees have a reputation of over half a century behind them. They are absolutely the best that can be grown.
PLUM.
The Plum delights in a cool, not too dry situation, and good, rich soil. The varieties we offer have been thoroughly tested, and are standbys. These may be relied upon to furnish yearly crops of this most delightful, highly profitable and exceedingly delicious fruit.

**Price:** of Plums: Each per 10 per 100
4 to 5 feet .................................. $0.40 $3.50 $25.00

**BURBANK'S JAPANESE PLUM.** One of the most popular. Fruit conical and very large. Color, dark metallic red. Flesh, yellow, firm and juicy; flavor, rich and sugary.

**ABUNDANCE.** Fruit large and roundish; a rich cherry color with a whitish bloom. Flesh, light yellow.

**WILD GOOSE.** Fruit medium to large, rich golden yellow shaded with red.

**LOMBARD.** One of the most extensively grown. Color purplish. Flesh, yellow.

**HAWKEYE.** One of the largest, best and most profitable market plums grown in the Northwest. Fruit large; splendid shipper.

**GREEN GAGE.** One of the oldest known varieties. Fruit medium. Color, greenish yellow.

PEACHES.
To secure fine fruit give them an occasional dressing of wood ashes. Prune and mulch every Spring.

**Price:** of Peach Trees Each per 10 per 100
4 to 5 feet .................................. $0.25 $2.00 $18.00

**ELBERTA.** Large; yellow with red cheek, of excellent quality. Freestone. Ripens July.

**SPECIAL OFFER No. 123.**
Four Plum, Four Peach, Two Crab Apple. Large standard trees, fine assortment, our selection. Ten trees in all, .................. $2.85

GRAPES.
No part of the fruit garden yields a richer harvest than the vineyard. Along almost any garden fence or walk there is room for vines enough to furnish luscious grapes from July to November.

**Price:** of Grapes: Each per 10 per 100
2 years, No. 1 .......................... $0.15 $1.20 $10.00

Black Grapes.

**CONCORD.** Early, decidedly the most popular grape in America, and deservedly so. Flesh, juicy, sweet, tender.

**WORDEN.** Bunch large, berries very large. Ripens 5 to 10 days earlier than the Concord.

**MOORE'S EARLY.** Berries extremely large and flavor is excelent. Produces heavy crops. Ripens 15 days before the Concord.

**CLINTON.** Bunch small to medium, and compact. Is used principally for wine.

Hill's "Home Vineyard" Collection.

**SPECIAL OFFER No. 124. Price $1.35.**
3 Concord 2 yr. No. 1 (Black)
1 Moore's Early 2 yr. No. 1 (Black)
3 Brighton 2 yr. No. 1 (Red)
3 Niagara 2 yr. No. 1 (White)

These are fine, large vines, and will astonish you with their thrift and sturdiness.

**Orders for 5 of a kind at 10 rates; 40 at 100 rates.**
RED GRAPES.

AGAWAM. Color red or maroon. Flesh tender and juicy. Vine a good grower and bearer.

BRIGHTON. Coppery red, bunches large. Flesh rich, sweet and of best quality. Ripens early.

DELAWARE. One of the finest of our native grapes. Bunches small and compact; berries small; light red.

WHITE GRAPES.

NIAGARA. Color pale yellow when fully ripe, sweet and of splendid quality. Ripens with the Concord.

FOCKINGTON. Bunch large, berries roundish, bright golden yellow when fully mature, juicy and of good quality.

MOORES DIAMOND. A pure native, bunch large, compact berries, medium size. Vine vigorous.

For price on grapes see page 32.

STRAWBERRIES

The first fruit to ripen in the Spring, its tempting appearance, delicious taste, and wholesomeness as a diet, have made them universally popular. It has been aptly named the "Queen of Small Fruits." The blossoms of all varieties marked "S" are bi-sexual or perfect, those marked "P" are destitute of stamens and are termed pistillate or imperfect. Imperfect varieties should have a row of perfect flowered sorts planted every third or fourth row to pollinate their blossoms. When imperfect blossoms are profusely fertilized they are the most prolific.

Price of Strawberries:

Selected strong plants, ...........................................$0.25 $1.50 $5.00

BEDERWOOD (S). Early, a very strong yielder, and continues a long time in bearing. The fruit is good size and as firm as the Crescent.

EUBACH (P). A well known variety, noted for its large size and productiveness. Ripening in Mid-summer. Especially recommended for home use or near market.

BRANDYWINE (S). Very vigorous growing plant and productive. Medium to large berries. Ripens medium to quite late.

CRESCENT (P). Succeeds well everywhere. Plant small; berries large. Very profitable variety.

JESSIE (S). The Jessie is one of the old standard varieties. We have grown it for many years. The berry is large, bright colored, of a good quality.

HAVERLAND (P). Exceedingly productive. Fruit large and fine. One of the most popular of the well-tested varieties.

PARKER EARLE (S). A very productive berry if all conditions are favorable. It must have very rich soil and plenty of moisture to mature its crop.

SENATOR DUNLAP (S). A variety that seems to give general satisfaction all over the country. Very productive. Large berry. Very dark red. A profit maker.

PRUNING AND SETTING. Before setting the plants cut the roots back, leaving them from four to five inches long, in the case of dormant plants. But should you defer setting until late in season, when the plant has started new feeding roots, then merely cut off the tip ends of the roots, just enough to even them up.

Special Offer No. 125.

25 Plants each of four varieties from above, 100 plants in all, our selection. Fine strong plants.

Price $1.10.
GOOSEBERRIES.
Should be planted in a rich soil and well manured once a year. Even more rugged and easier grown than Currants, and certainly should be given a place in every garden. Do not let bushes grow too thick; the fruit will be larger and more plentiful. We offer only the best tested varieties that will do well anywhere.

**Price:**
- Each per 10 per 100
- Strong 2 yr. plants $0.25 $2.00 $15.00

**INDUSTRY.** Large, one of the best; fruit red, smooth and juicy.

**DOWNING.** Large, light green; soft, tender, good flavor extremely vigorous, hardy and prolific.

**HOUGHTON.** Most productive; best payer of all, yield easily 700 bushels per acre; fruit excellent quality.

**RED JACKET** Fruit large, red. One of the finest in cultivation.

Hill's “Suburban” Collection.
Special Offer No. 126. Price $2.50.

- 2 Industry Gooseberry
- 5 Snyder Blackberry
- 2 Perfection Currants
- 6 Asparagus Roots
- 5 Cuthbert Raspberries
- 5 Rhubarb Roots

Hill's 26 best “Small Fruit” plants. All big strong and healthy. Enough fruit for a small home. Will pay for itself many times over the first season.

CURRANTS.
Hardy, easily cultivated, standing neglect well, and liberally responding to cultivation and generous treatment; indispensable for table use, jellies, etc. No garden is complete without them. Set four feet apart in rich ground. If the currant worm appears, dust with hellebore. All 2 year plants well rooted and strong.

**Price:**
- Each per 10 per 100
- 2 year No. 1 $0.20 $1.75 $15.00

**PERFECTION.** Very large bright red; a great bearer. The Perfection has a long stem, making it easy to pick. Excellent for jelly, jams, etc.

**RED DUTCH.** Well known old variety, very productive; excellent quality.

**VICTORIA.** Red, long bunches, very productive. One of the best.

**WHITE GRAPE.** A white currant. Berries large, very productive. Sweet and mild, excellent for table use.

**WHITE DUTCH.** A white currant. Well known old variety of excellent quality.

**BLACK CHAMPION.** The leading world tested Black Currant, very productive. Excellent quality; strong grower.

RASPBERRIES.
Plant 4 feet apart each way.

**Price:**
- Each per 10 per 100
- Strong roots $0.15 $1.00 $8.00

**CUTHBERT.** (Red) A strong hardy variety. Berries large; excellent quality. One of the best.

**COLUMBIA.** (Red) Berries of good size and flesh very firm. Excellent for market and canning purposes; productive.

**KANSAS.** (Black Cap) A valuable variety. Extra hardy; berries large. A good shipper.

**GREGG.** (Black Cap) Old reliable market variety. Fruit large.

BLACKBERRIES.

**Price:** Strong roots, each $0.15; per 10 $1.00; per 100 $4.00.

**SNYDER.** One of the best. Berries juicy and sweet. Large and productive.

**ANCIENT BRITON.** Another hardy variety. Ripens after the Snyder.

ASPARAGUS.

**Price:** Strong roots, each $0.10; per 10 $0.50; per 100 $2.00

**CONOVERS COLOSSAL.** Produces large tender shoots. Delicious, healthful and easily grown.

**COLUMBIA MAMMOUTH.** A variety of mammoth size. One of the best. Early.

RHUBARB.

**Price:**
- Each per 10 per 100
- Strong roots $0.15 $1.25 $8.00

**LINNEUS.** Early and tender. Excellent for pies.

**GIANT.** Fine quality. Best for canning. Good keeper.
PLANT FOR PROFIT.

Owing to the widespread interest in forestry and wood-lot planting and the enormously increased demand for valuable native forest species, our facilities for producing forest-tree seedlings has increased from year to year, until now our annual output consists of many millions of plants. Not only are the large Lumber and Railroad companies planting on a large scale, but farmers, and landowners all over the country are rapidly beginning to realize that the establishment of woodlots or shelter-belts is just as important as the raising of staple crops, and the profits larger and surer. The prevailing opinion that you have to wait generations for returns is false. Many plantations planted six and eight years ago are already a source of big revenue to their owners, and growing more valuable each year, and cases are on record where groves of five years standing have produced fence posts in quantity sufficient to liquidate the original investment many times over, and then the grove was only thinned out here and there. Nor does it entail any great expenditure of money to establish a woodlot or grove of say one acre in extent. By planting the seedlings 6x6 feet apart each way, 1210 trees will be required. The planting can be accomplished economically. From data gathered from reliable sources we find that the average man can plant 1000 trees per day, where the ground is in good condition and the soil prepared as for corn and marked out, and where the land is rougher and harder to work, 500 to 800 trees per day would be the average. Their care after planting is a small item, requiring only frequent cultivation same as corn for the first few seasons. It will be seen therefore that groves or woodlots can be established at a cost considerably less than $15.00 per acre. According to the variation in cost of the different varieties of seedlings.

Catalpa Speciosa.

The Catalpa Speciosa is preeminently the fastest growing variety known, that has a high value as timber. They will grow, if planted on good soil and well tended while small, nearly one inch in thickness each year of their growth. The practical value of this tree is certainly not overestimated. Notwithstanding its quick growth its timber has been proven, by actual tests to be more durable than a good many of the slow growing hardwoods. The reason for this, authorities state, is that the Catalpa has the peculiar power of absorbing those substances from the soil which in concentrated form, resist the microbes of decay. When you stop to consider the enormous amount of money expended annually by farmers renewing rotted fence posts, or by railroad companies and other large corporations in chemical treatment of wood for cross ties to increase its durability, it is easy to see why the Catalpa Speciosa, whose wood is absolutely rot resistant, has jumped so quickly into favor, and why it is almost impossible for growers to supply the immense demand for seedlings. On account of the prominence given this variety by several of the leading Agricultural papers, not only have thousands of small groves or wood lots of one or more acres in extent been established, but many large commercial plantations of from 300 to 600 acres have been planted out. These have proven excellent investments, and in many cases large profits have been realized as early as four or five years after planting. Our seedlings this season are of extra quality, strong and stocky, are graded to the following sizes and tied in bunches of 100 each.

BLACK LOCUST. Another variety possessing high value for timber and fuel. Can be grown successfully over a wide range of territory. A high point in its favor is that it succors from the root, theretfor a grove of Black Locust is permanent. In point of poularity it is next to the Catalpa Speciosa.

**HARD OR SUGAR MAPLE.** This is primarily a shade and ornamental tree. Its rate of growth is rather slow, but it grows to a large size, develops a splendid head, and lives to a great age. The wood of the Sugar Maple is used in large quantities for flooring and interior finish and in the manufacture of woodenware, spindles, and novelties. It has a high fuel value and produces high grade charcoal. Maple Sugar is almost the exclusive product of this tree.

**EUROPEAN LARCH.** This is an extremely valuable tree. A very rapid grower and much used for planting along fence lines, because it quickly grows up into a living post, and lasts a lifetime, and forms at the same time a valuable windbreak. Good results are also obtained by planting in groves, planting the trees 6x6 feet apart each way. An acre of European Larch in from five to eight years will pay for itself many times over, from the thinning alone. Grows 75 feet in height.

The Value of Windbreaks and Woodlots. The value of Windbreaks and Woodlots, especially if located on the open prairies, can never be too highly emphasized. Trees are an important factor on any farm where they exist, and could be made of equal value on thousands of others. It has been proven that fields surrounded by trees, yield larger crops than they would otherwise because they retain the moisture in the soil, by acting as Windbreaks. At the same time they will also furnish wood for fuel and fence posts. Many think that the planting of a few thousand trees is a great deal larger task than it really is. One man can plant out several hundred trees a day. Some imagine the cost would be excessive, whereas as seedling of a suitable size for planting can be obtained at a very reasonable figure. A Windbreak or Woodlot composed of more than one species is usually the most effective, and the list above includes only those varieties which do well generally in all parts of the country, and which have high timber value.

American Arbor Vitæ Hedge.

Hill's Hardy Hedge Plants.

Hedges have long held the center of the stage in all garden and lawn plantings and well do they deserve this honor, for their beauty and utility is apparent to everyone, and their uses are manifold. Seldom if ever is a definite scheme of planting carried out that does not include the use of hedges either for ornamental effects, boundary line, shelter, live fences, or simply for walk or driveway border. Their use is everywhere considered the one most attractive and economical method that can be employed in ornamenting the home grounds. Indeed, so popular are they that it has become almost impossible to grow enough to meet the great demand. Being of easy culture after planted out and of quick growth, a perfect hedge can be obtained in a surprisingly short time by the use of any of the varieties named herewith. No grounds are so small that they should not include the use of a hedge or border of some sort.

AMERICAN ARBOR VITAE.

For years a general favorite and everywhere considered the best Evergreen hedge plant in existence. Its main features are, absolute hardness, adaptability to shearing, and attractiveness of foliage, and surely the latter is not the least, as the foliage of the Arbor Vitae, with its beautiful spray-like branches, is surely one of the most beautiful sights imaginable, especially in the Winter, when the green foliage of leafy trees and shrubs have fallen off. By shearing freely, it can be kept low and dense, or trained to high form just as may be desired. The Arbor Vitae has so many good features, that it is easily the "leader" in the list of Evergreen hedges. It is planted with entire success in any part of the country. It is easily cared for, and its beauty enhances as it grows older.

Price: Transplants
10 to 12 inch .............. $0.75
1 to 1½ feet .......... 1.00

HEMLOCK.

Nothing in our opinion is so peculiarly graceful and beautiful as a well kept Hemlock Hedge. Either as an ornamental boundary, or for a protective screen, no other Evergreen can equal it in grace and beauty. Hemlock resembles very closely the famous old yew hedges of England, retaining a green and cheerful appearance throughout the whole year. It is easily cared for, and its beauty enhances as it grows older, eventually forming an absolutely impenetrable barrier, thick, bushy and symmetrical. It is not uncommon to see Hemlock Hedges 35 to 60 years of age and indeed their highest point of beauty is reached at that time. It is hardy everywhere, never winter kills, and grows moderately fast, necessitating the use of shears every year for the first several years and thereafter every other year.

Price: Transplants
10 to 12 inch .............. $2.00

DIRECTIONS FOR PLANTING AND CARE OF HEDGES.

After determining the location of the hedge, the strip of ground should be spaded over deeply, for a width of two feet, and the plants placed in the center of this pulverized strip. The proper distance apart for the plants will be determined by their size. Plants, up to 1 to 1½ feet tall, 1 foot apart; plants 1½ to 2 feet and 2 to 3 feet, should be set eighteen inches apart. Cut back severely as soon as planted all hedge plants, except Evergreens, which should not be touched with shears the first season. The second year the plants ought to make a good growth and a clipping during the Summer, during the months of May or June, will be necessary. If inclined to grow strongly, more frequent trimming than once a year will be beneficial as it should always be the aim to produce a mass of foliage, especially at the base of the hedge. It is well to keep in mind, especially in regard to Evergreen hedges, that for the first two or three years the shearing should not be severe, as the object is to encourage and not weaken the growth. The most commendable form to trim is a round, instead of perpendicular, and with oval top, not flat or horizontal. By so doing the side and top branches are exposed equally to the sunshine and rain and a more symmetrical hedge will be the result.

HEDGES, WINDBREAKS, SHELTERS AND LIVE FENCES. By E. P. Powell, A treatise on the planting, growth and management of hedges for country and suburban homes. It gives accurate directions concerning hedges, how to plant and how to treat them; especially concerning wind-breaks and shelters. It includes the whole art of making a delightful home, giving directions for nooks and balconies.

140 Pages, 5x7 inches, Cloth .................................................. 50 cents.
AMOORE RIVER PRIVET.

Preeminently the best variety in existence for hedge purposes, and leader in the class of deciduous hedges. It is recognized the world over as the "Ideal Hedge Plant." A remarkably vigorous grower, compact and regular in form, with glossy wax-like foliage of bright green color. It thrives in all kinds of soils and situations, enduring equally well shade and sun, smoke and dust. In the south it is practically Evergreen, retaining its beautiful green leaves all Winter. Can be sheared and trimmed readily to any desired form and is entirely free from disease or insect attack. An extremely fast grower, forming a beautiful hedge in two seasons, and one of the easiest varieties to transplant on account of their wonderful root system. It is a variety notable because of absolute hardiness even in cold northern climates, and it is due to this fact perhaps more than any other, that it jumped so quickly into favor upon its introduction several years ago, and its popularity has steadily increased each year until undoubtedly it is now planted more extensively than any other variety offered. It seems to grow with entire success in all parts of the country, both North, East, South and West, and all who see it at once become enthusiastic in their praise of this wonderful hedge plant.

Price: Transplants 10 $1.50 50 $6.00 100 $8.00
1 1/2 to 2 feet ..........$1.50 $6.00 $8.00

JAPANESE BARBERRY.

Of all Deciduous Shrubs, this we believe, is the most valuable for making low hedges. Of Japanese origin and of rather dwarfish habit of growth, low, regular and compact, requiring very little pruning. It has fine thorns and small round green leaves that change color in Autumn to a brilliant fiery crimson. Creates one of the most beautiful hedges imaginable and is made still more beautiful by great numbers of pretty drooping yellow flowers which are followed in the Fall by bright red berries in great clusters which adhere to the branches throughout the Winter. It is of slow compact growth, but will eventually attain a height of five or six feet. See color reproduction on cover.

Price: 1 to 1 1/2 feet, Transplants, per 10 $2.00; per 50 $8.00; per 100 $15.00

CALIFORNIA PRIVET. The old reliable hedge plant and decidedly popular. Forms beautiful, symmetrical live fences of great density. In middle and southern states where largely planted it retains its beautiful shining green leaves nearly the entire year. It is a rapid grower and untrimmed grows to 12 feet tall, but is easily kept to any desired height or shape by shearing and soon forms a solid mass of foliage.

Price: 1 1/2 to 2 feet, Transplants, per 10 $1.50; per 50 $5.00; per 100 $8.00

AMERICAN WHITE SPRUCE.

This variety forms an unusually attractive hedge as will be seen from illustration and is particularly to be recommended for use in exposed situations. Its dense compact form shuts out the coldest of Winter winds, and its foliage which keeps green all season is particularly cheerful in Winter. Fast grower, and prunes very easily, soon forming a dense heavy hedge. Becoming more popular each season.

Price: Transplants 10 50 100
1 to 1 1/2 feet $2.00 $6.00 $10.00

White Spruce Hedge.
FOUR GRAND JAPANESE NOVELTIES
RARE IMPORTED STOCK
JAPAN MINIATURE TREES

The secret of propagating these wonderful little trees is known only to the Japanese. They live to be centuries old. Our imported stock comprises the greatest number of forms and sorts. They come in quaint Japanese pots. See illustration.

These small trees are very beautiful as table pieces or for balconies, terraces, etc., and are not surpassed in delicate grace by any plant. Of easy culture; should be kept warm in sunny, airy situation. Water sparingly once a day during Summer. Price, $1 each.

BEAUTIFUL JAPANESE MAPLES

JAPANESE WEEPING CHERRY. Most beautiful of all weeping trees. Graceful, drooping branches, literally covered with delicate white blossoms, giving us the handsomest and most picturesque of all flowering trees. Thrives on any soil and requires no care other than a good mulch during the winter months. When in blossom, this tree appears like a huge bank of snow, so profusely do the blossoms hang from the slender branches. We take pleasure in being able to furnish these fine trees to our friends and customers. Every tree is grafted and receives careful attention that all may grow to perfect form. Even when grafted on tall stems, its slender branches sometimes sweep the grass in graceful garlands. Price, 4 to 5½ ft., stems, $2 each.

JAPANESE ROSE-FLOWERED CHERRY. This is the most remarkable variety of flowering cherry ever produced in Japan. Remarkable for the softness and exuberance of its flowers, blooming in the warm pleasant Spring days. The exquisite blossoms are borne in great abundance, completely covering the tree. The foliage is delightful. Their proper place is on the lawn, where they show up to fine advantage in contrast to the green. Their effect in early Spring is grand beyond description, and their superior staleness of form, splendor of growth and lavish yield of fragrant flowers, place it in the foremost rank among hardy ornamental trees and shrubs. While any good soil is sufficient to insure their growth, they succeed best in a soil which is warm, rich and dry.

Japanese Weeping Cherry.

Price, 3 to 4 ft., $1.50 each, $3.75 for 3.

TREE HYDRANGEA. A most attractive flowering shrub, growing into tree form. Straight, clean stem three feet tall, crowned with a mass of beautiful white flowers in midsummer. Very desirable for lawn planting and grows more beautiful every season, spreading and enlarging its crown, reaching six feet in diameter, bearing hundreds of flowers at one time. Price, 3 to 4 feet, 75 cents. each, $2.10 for 3.

PLANTING ADVICE DEPARTMENT. This department is open to everybody interested in the culture of Trees, Shrubs and Plants, and the service is entirely free of charge. Any one wishing advice or help on anything pertaining to horticulture—not covered by any of the numerous articles herein—is cordially invited to write us. Our aim is to make this book a manual and authoritative reference, but where space is limited, we are more than glad to supply further detailed information by letter. Address your inquiry (in separate letter from order) to D. Hill, Planting Advice Department, Desk 10, Dundee, Ill.
Novelties and Specialties

IN

HILL'S CHOICE SELECT TREE AND SHRUB SEEDS

Seeds of trees and shrubs as a general rule should be planted during the months of April, May and June, same as garden or flower seeds, and their culture is almost identical, great care being necessary to see that the seed is not planted too deep. The seed comes best when planted in rich, sandy loam, and the plants should be naturally or artificially sheltered from heavy east and northeast winds.

Free Delivery By Mail.—All seeds ordered at the packet, ounce or pound prices will be sent by mail, postage prepaid by us, to any address in America.

All seeds are carefully tested. Our aim is to make quality the first consideration, our half century’s reputation being behind these seeds, just as it is back of our trees and plants, and we earnestly solicit a share of your kind orders for 1910.

Norway Spruce.—This is a variety of inestimable value, for it grows into large beautiful trees admired by everybody; and serve as windbreaks or can be planted on lawns for shade, ornament, &c. Grows quickly into big trees with luxuriant foliage. This is the variety so popular for Christmas trees. Price per package 5c; per oz. 15c; per ¼ lb. 50c; per lb. $1.65.

Box Elder.—A wonderful variety and popular because of its quick growth and drought enduring qualities. It grows freely, and can be planted anywhere. Price postpaid—per package 5c; per oz. 8c; per ¼ lb. 20c; per lb. 60c.

Scotch Pine.—A variety almost without equal for the west and northwestern States. It is entirely hardy, of quick and sturdy growth, and does not require much rich soil as some varieties. Grows to large size, 60 to 80 feet tall and is very ornamental. Price postpaid—per package 10c; per oz. 35c; per ¼ lb. 80c; per lb. $2.50.

White Birch.—The most useful and ornamental variety planted to-day. It has the greatest timber value of all and is used extensively for reforestation purposes. A fast grower and perfectly hardy. Price postpaid—per package 5c; per oz. 15c; per ¼ lb. 50c; per lb. $1.95.

Paper Birch.—A delightfully attractive tree and easily grown from seed. The bark is creamy white and paper-like—hence its name. Price postpaid—per package 10c; per oz. 30c; per ¼ lb. $1.00.

European Larch.—A variety which has become very popular. A quick grower, and satisfactory in every way. Good for timber, and develops into large trees 80 to 100 feet high. Price postpaid—per package 10c; per oz. 20c; per ¼ lb. 65c.

Black Birch.—Another member of the Birch family, and favorably known because of the fact that it will grow on low lands and along rivers, creeks, &c. Price postpaid—per package 5c; per oz. 10c; per ¼ lb. 30c.

Austrian Pine.—Very valuable, especially in the west and northwest. Price postpaid—per package 5c; per oz. 15c; per ¼ lb. 50c; per lb. $1.75.

Catalpa Speciosa.—One of the very best timber trees in existence to-day and is being more widely planted than ever. Grown easily from seed, and will attain a height of (OVER)
from 3 to 8 feet in two seasons, and on rich soil it will grow to form three large fence posts in four to five seasons. A really remarkable tree, worthy of its popularity and should be planted by everyone. Price postpaid—per package 5c; per oz. 15c; per ¼ lb. 50c; per lb. $1.85; per 10 lb. (by express) $16.00.

**Dwarf Mt. Pine.**—Of dwarfish habit, round and bushy, and perhaps the rarest of all conifer trees. Certainly it is the most valuable dwarf tree of all. It is of foreign origin, but grows well everywhere. Price postpaid—per package 10c; per oz. 25c; per ¼ lb. 85c.

**Citrus Trifolata.**—Or Hardy Orange. Wonderfully productive and a very successful grower. Price postpaid—per package 10c; per oz. 25c; per ¼ lb. 86c.

**Persimmon.**—Bears a very luscious fruit, and is very popular. Has luxuriant foliage. Price postpaid—per oz. 25c.

**Nordman’s Fir.**—Belongs to the fir family and one of the most beautiful of all. Has dark green foliage, making it a pretty tree for lawn. Price postpaid—per package 15c; per oz. 30c.

**Blue Spruce.**—Has sparkling gorgeous blue foliage, and the most ornamental tree that grows. Should be on every lawn. Price postpaid—per package 10c; per oz. 25c; per ¼ lb. 90c.

**Russian Olive.**—A fine hardy, popular tree and very ornamental. Forms a dense bush. Price postpaid—per package 10c; per oz. 20c.

**White Ash.**—Very popular in all parts of the country, but especially so in the west. Very valuable and fast, strong grower. Price postpaid—per package 5c; per oz. 10c; per ¼ lb. 15c; per lb. 50c; per 10 lb. (by express) $4.00.

**Pinion Pine.**—A very pretty little tree which grows wild in the Rocky Mountains. Hardy and very ornamental. Price postpaid—per package 5c; per oz. 10c; per ¼ lb. 25c; per lb. 50c.

**Hemlock Spruce.**—per package 10c; per oz. 20c; per ¼ lb. 75c.

**Black Hill Spruce.**—per package 20c; per oz. 50c; per ¼ lb. $1.50.

**Concolor Fir.**—per package 5c; per oz. 15c; per ¼ lb. 50c.

**White Spruce.**—One of our best native species and very hardy and popular. Price postpaid—per package 15c; per oz. 25c; per ¼ lb. 90c; per pound $3.00.

**Red Cedar.**—Per package 5c; per oz. 10c; per ¼ lb. 35c; per lb. $1.10.

**Red Spruce.**—Per package 10c; per oz. 15c; per ¼ lb. 50c.

**Pitch Pine.**—Per package 5c; per oz. 10c; per ¼ lb. 60c.

**Taxus Baccata.**—(Japanese Yew). A very scarce and wonderful variety. One of the most beautiful trees in existence. Per package 15c; per oz. 25c; per ¼ lb. 95c.

**Taxus Cuspidata.**—(Yew). Per package 10c; per oz. 20c; per ¼ lb. 75c.

**Honey Locust.**—Per package 5c; per oz. 10c; per ¼ lb. 30c.

**Black Locust.**—Per package 5c; per oz. 10c; per ¼ lb. 20c; per lb. 60c.

**Russian Mulberry.**—A free grower and bears luscious fruit, which is eagerly eaten by fowls and pigs. Fruit has sub-acid sweet taste and is very delightful. Price—per package 10c; per oz. 35c; per ¼ lb. $1.00.

**Sycamore.**—A fine shade tree and a strong, fast grower. Price—per package 5c; per oz. 15c; per ¼ lb. 50c.

**Wild Black Cherry.**—Grows into large trees and in summer are literally covered with dark, delicious fruit. Price per package 5c; per oz. 10c; per ¼ lb. 35c; per lb. $1.

**European Linden.**—Per package 10c; per oz. 15c; per ¼ lb. 50c.

**American Linden.**—Per package 10c; per oz. 15c; per ¼ lb. 50c.

**Red Oak.**—Per oz. 5c; per ¼ lb. 15c; per lb. 25c. By express, 10 lb. $1.00; by bushel 50 lb. $3.50.

**Wayfaring Tree.**—Very rare and beautiful—per package 15c; per oz. 25c.

**Purple Barberr.**—Fine hedge plant—per package 10c; per oz. 20c; per ¼ lb. 75c.

**Kentucky Coffee Tree.**—Package 5c; oz. 15c; ¼ lb. 40c.

Hill's "National" Collection

In the ovals herewith are reproduced from actual photographs six of the best and most valuable Berried and Flowering shrubs. The Berried shrubs, consisting of Snowberry, Coral Berry and Barberry, are simply superb; and for striking beauty of flower, and delicious fragrance, there is nothing more charming than the Purple Lilac, Golden Mock Orange, and Weigela rosea. These shrubs will give immediate effect, as they are large, strong three-year-old plants. Six superior Berried and Flowering shrubs for 95 cents. Please order as "National Collection."
